Medicine

Books and Journals from
Cambridge University Press

The Cambridge Medicine programme focuses its book publishing in a defined set of core clinical areas with our great strength in the clinical brain sciences. Other specialties of significant focus include reproductive medicine/obstetrics and gynaecology, anaesthesia and critical care, emergency medicine and pathology.

Our journals programme covers a broad spectrum of medical disciplines including emergency and disaster medicine, epidemiology and infectious diseases, biomedical science, genetics, nutrition, mental health and psychiatry, and neuroscience.

We partner with many learned societies including The Society for Healthcare Epidemiology of America, the Neuroscience Education Institute, and the Royal College of Obstetricians and Gynaecologists.

CONTENTS

Original Articles

- 127** Deactivation of SARS-CoV-2 with pulsed-xenon ultraviolet light: Implications for environmental COVID-19 control
Sarah E. Simmons, Ricardo Carrion Jr, Kendra J. Alfson, Hilary M. Staples, Chetan Jinadatha, William R. Jarvis, Priya Sampathkumar, Roy F. Chemaly, Fareed Khawaja, Mark Povroznik, Stephanie Jackson, Keith S. Kaye, Robert M. Rodriguez and Mark A. Stibich
- 131** Understanding public perception of coronavirus disease 2019 (COVID-19) social distancing on Twitter
Sameh N. Saleh, Christoph U. Lehmann, Samuel A. McDonald, Mujeeb A. Basit, and Richard J. Medford
- 139** Nosocomial hepatitis A outbreak among healthcare workers and patients in a community hospital during an ongoing statewide outbreak
Julia Brennan, Heather Mullins, Kelley Tobey, Cassandra Jones, Marion A. Kainer, Michelle Fiscus, Stephen May, John R. Dunn, William Schaffner and Timothy F. Jones
- 142** Direct costs and clinical impact of adenovirus genotype 8 conjunctivitis outbreak in a neonatology unit
María Florencia Angueyra, Débora Natalia Marcone, Florencia Escarrá, Noelia Soledad Reyes, Yamile Rubies, Delcys Albas, Pamela Elizabeth Rodríguez, Santiago Vidaurreta, Guadalupe Carballal and Marcela Echavarría
- 149** Management of *Candida auris* outbreak in a tertiary-care setting in Saudi Arabia
Majid M. Alshamrani, Aiman El-Saed, Azzam Mohammed, Majed F. Alghoribi, Sameera M. Al Johani, Harold Cabanalan and Hanan H. Balkhy
- 156** Evolution of the environmental microbiota of a new neonatal intensive care unit (NICU) and implications for infection prevention and control
Philip Zachariah, Felix D. Rozenberg, Stephania Stump, Dagmara I. Moscoso, Ganga Krishnamurthy, Lisa Saiman, Anne-Catrin Uhlemann and Daniel E. Freedberg
- 162** Clinical impact of early reinsertion of a central venous catheter after catheter removal in patients with catheter-related bloodstream infections
Yu-Mi Lee, Byung-Han Ryu, Sun In Hong, Oh-Hyun Cho, Kyung-Wook Hong, In-Gyu Bae, Won Gun Kwack, Young Jin Kim, Eun Kyoung Chung, Dong Youn Kim, Mi Suk Lee and Ki-Ho Park
- 169** Utilization of cumulative antibiograms for public health surveillance: Trends in *Escherichia coli* and *Klebsiella pneumoniae* susceptibility, Massachusetts, 2008–2018
Quynh T. Vo, R. Monina Klevens, Barbara Bolstorff, Kerri Barton, Melissa Cumming, Jennifer A. Blumenthal, T. Scott Troppy, Joseph M. Gerth and Alfred DeMaria Jr

- 176** Conditional reflex to urine culture: Evaluation of a diagnostic stewardship intervention within the Veterans' Affairs and Centers for Disease Control and Prevention Practice-Based Research Network
Kimberly C. Claeys, Min Zhan, Lisa Pineles, Alison Lydecker, Gosia Clore, Michihiko Goto, Surbhi Leekha, Darren Linkin, Charlesnika T. Evans, Barbara W. Trautner, Matthew B. Goetz, Jonathan D. Baghdadi, Eli N. Perencevich and Daniel J. Morgan
- 182** Risk stratification tool for all surgical site infections after coronary artery bypass grafting
Giuseppe Gatti, Antonio Fiore, Alessandro Ceschia, Fiona Ecarnot, Rim Chaara, Roberto Luzzati, Thierry Folliguet, Sidney Chocron, Aniello Pappalardo and Andrea Perrotti
- 194** Improving the communication of hand hygiene procedures: Controlled observation, redesign, and randomized group comparisons
Francis T. Durso, Sweta Parmar, Ryan S. Heidish, Skyler Tordoya Henckell, Omer S. Oncul and Jesse T. Jacob

State of the Pandemic Commentary

- 203** The perplexing problem of persistently PCR-positive personnel
David K. Henderson, David J. Weber, Hilary Babcock, Mary K. Hayden, Anurag Malani, Sharon B. Wright, A. Rekha Murthy, Judith Guzman-Cottrill, Sarah Haessler, Clare Rock, Trevor Van Schooneveld, Latania Logan and Corey Forde for the SHEA Board of Trustees
- 205** Whither immunity? The search for effective, durable immunity to coronavirus disease 2019 (COVID-19)
David K. Henderson, Sarah D. Haessler, Mary K. Hayden, David J. Weber, Hilary Babcock, Anurag Malani, Sharon B. Wright, A. Rekha Murthy, Judith Guzman-Cottrill, Clare Rock, Trevor Van Schooneveld, Corey Forde Latania K. Logan and for the SHEA Board of Trustees

Commentary

- 208** The role of dedicated biocontainment patient care units in preparing for COVID-19 and other infectious disease outbreaks
Jade B. Flinn, Noreen A. Hynes, Lauren M. Sauer, Lisa L. Maragakis and Brian T. Garibaldi

Concise Communication

- 212** Seroprevalence of SARS-CoV-2 antibodies in healthcare workers at a London NHS Trust
Joseph J. Grant, Stephanie M.S. Wilmore, Naina S. McCann, Owain Donnelly, Rebecca W.L. Lai Matthew J. Kinsella, Helena L. Rochford, Trupti Patel, Michael C. Kelsey and Julie A. Andrews
- 215** Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) nucleic acid contamination of surfaces on a coronavirus disease 2019 (COVID-19) ward and intensive care unit
Sarah N. Redmond, Khalid M. Dousa, Lucas D. Jones, Daniel F. Li, Jennifer L. Cadnum, Maria E. Navas, Nataliya M. Kachaluba, Sandra Y. Silva, Trina F. Zabarsky, Elizabeth C. Eckstein, Gary W. Procop and Curtis J. Donskey
- 218** Absence of nosocomial influenza and respiratory syncytial virus infection in the coronavirus disease 2019 (COVID-19) era: Implication of universal masking in hospitals
Shuk-Ching Wong, Germaine Kit-Ming Lam, Christine Ho-Yan AuYeung, Veronica Wing-Man Chan, Newton Lau-Dan Wong, Simon Yung-Chun So, Jonathan Hon-Kwan Chen, Ivan Fan-Ngai Hung, Jasper Fuk-Woo Chan, Kwok-Yung Yuen and Vincent Chi-Chung Cheng

- 222** A quality improvement project to decrease utilization of multilumen peripherally inserted central catheters
Jennifer Kleinman Sween, Angela Lowrie, Jane M. Kirmse, Rena Kane Laughlin, Brooke Wodziak and Priya Sampathkumar
- 225** Comparison of central-line-associated bloodstream infections between central venous catheters lined by combined chlorhexidine and silver sulfadiazine versus silver ionotrophes alone: A before–after–before retrospective study
Youssef Z. Abouleish, Edward C. Oldfield and Paul E. Marik

Research Brief

- 228** Changes in hospitalized coronavirus disease 2019 (COVID-19) patient characteristics and resource use in a system of community hospitals in the United States
Kenneth E. Sands, Richard P. Wenzel, Laura E. McLean, Kimberly M. Korwek, Jonathon D. Roach, Russell E. Poland, Karla M. Miller, L. Hayley Burgess, Edmund S. Jackson and Jonathan B. Perlin
- 229** Implementation of infection control measures to prevent healthcare-associated transmission of severe acute respiratory coronavirus virus 2 (SARS-CoV-2)
Alexander J. Lepak, Daniel K. Shirley, Ashley Buys, Linda Stevens, and Nasia Safdar
- 233** Impact of coronavirus disease 2019 (COVID-19) pandemic isolation measures on the rate of non-COVID-19 infections in hematology patients
Jemima H. Miller, Stephen S. Opat, Jake Shortt, Despina Kotsanas, Claire Dendle and Maryza Graham

Letters to the Editor

- 236** Coronavirus disease 2019 in Italy: The Veneto model
Ugo Grossi, Giacomo Zanusi and Carla Felice
- 237** Battle with COVID-19 in Iran: What lessons can be learned from the implementation of response strategies so far?
Mehrdad Amir-Behghadami, Ali Janati and Masoumeh Gholizadeh
- 239** To relax restrictions: Are communities ready to deal with repeated epidemic waves of COVID-19?
Jiancong Wang, Yew Fong Lee, Fangfei Liu and Mouqing Zhou
- 240** Regional difference in the rate of spread of SARS-CoV-2
Kazuhiro Tanabe, Katsuhiko Sasaki, Ko Igami and Kazuyuki Kamioka
- 242** A case of COVID-19 with an ultralong incubation period
Yujin Wang, Qingwen Wang, Kai Wang, Congkuan Song, ZiXin Guo and Weidong Hu
- 244** Maintaining mask stockpiles in the COVID-19 pandemic: Taiwan as a learning model
Cho-Hung Chiang, Cho-Hsien Chiang and Cho-Han Chiang

- 245** The feasibility of generalized face mask usage during the COVID-19 pandemic: a perspective from Latin America
Daniel Moreno Soto, Walter D. Cardona Maya, Esteban Londoño Agudelo and Julio C. Bueno-Sánchez
- 247** Dealing with skin reactions to gloves during the COVID-19 pandemic
Mohammadreza Tabary, Farnaz Araghi, Soheila Nasiri and Sahar Dadkhahfar
- 248** Pharynx gargle samples are suitable for SARS-CoV-2 diagnostic use and save personal protective equipment and swabs
Monika Malecki, Jessica Lüsebrink, Stefanie Teves and Andreas F. Wendel

Erratum

- 250** Impact of the coronavirus disease 2019 (COVID-19) pandemic on nosocomial *Clostridioides difficile* infection — ERRATUM
Manuel Ponce-Alonso, Javier Sáez de la Fuente, Angela Rincón-Carlavilla, Paloma Moreno-Nunez, Laura Martínez-García, Rosa Escudero-Sánchez, Rosario Pintor, Sergio García-Fernández and Javier Cobo

Corrigendum

- 251** Comparison of central-line-associated bloodstream infections between central venous catheters lined by combined chlorhexidine and silver sulfadiazine versus silver ionotrophes alone: A before–after–before retrospective study — CORRIGENDUM
Youssef Z. Abouleish, Edward C. Oldfield, and Paul E. Marik
- 252** Intraoperative bacitracin irrigations for the prevention of surgical site infections—Consider the alternatives – CORRIGENDUM
Lina Meng, Stan Deresinski and Marisa Holubar

MICROBIAL SURVEILLANCE TESTING MADE EASY

Healthmark offers the One-Two Punch to Identify and Document the Efficacy of Your Endoscope Reprocessing

SCREEN WITH THE **NOW! TEST**

*Rapid Indicator of
Gram-Negative bacteria*

Immediate, practical screening test. Simply flush the lumen of a flexible endoscope, such as a duodenoscope, and follow the procedure for gram-negative bacteria detection in less than 12 hours.

< 10 CFU

 **healthmark**

AUDIT WITH THE **FLEXIBLE ENDOSCOPE SAMPLING KIT**

Surveillance tool for the random testing of duodenoscopes in compliance with CDC guidelines - In association with Nelson Laboratories

A simple and complete kit. After flushing and brushing the lumen and elevator mechanism of a duodenoscope, simply follow the procedure to have the sample solution & brush heads quickly sent to Nelson Laboratories - the leader in independent testing of flexible endoscopes. All tools are included for testing and shipment.

Infection Control & Hospital Epidemiology (ISSN 0899-823X) is published monthly by Cambridge University Press, One Liberty Plaza, New York, NY 10006, USA.

Editorial Office

Communications should be addressed to the Editor, *Infection Control & Hospital Epidemiology*, One Liberty Plaza, New York, NY 10006 (email: iche.managingeditor@cambridge.org). Contributors should consult the Instructions for Contributors, which is available at the journal's Web site.

Advertising

Please direct advertising inquiries to M. J. Mrvica Associates, 2 West Taunton Avenue, Berlin, NJ 08009 (e-mail: mjmrvica@mrvica.com; telephone: 856-768-9360, fax: 856-753-0064). Publication of an advertisement in *Infection Control & Hospital Epidemiology* does not imply endorsement of its claims by the Society for Healthcare Epidemiology of America, by the Editor, or by Cambridge University Press.

Permissions

Articles may be copied or otherwise reused without permission only to the extent permitted by Sections 107 and 108 of the US Copyright Law. Permission to copy articles for personal, internal, classroom, or library use may

be obtained from the Copyright Clearance Center (<http://www.copyright.com>, email: info@copyright.com). For all other uses, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, please contact Cambridge University Press. Full details may be found at: www.cambridge.org/about-us/rights-permissions.

Subscriptions

The individual subscription rate for 2021 is \$296. Individuals have the option to order directly from Cambridge University Press. Institutional print + electronic and e-only subscriptions are available from Cambridge University Press and include unlimited online access; rates are tiered according to an institution's type and research output and may be reviewed at the journal's homepage on Cambridge Core: cambridge.org/ICHE.

Please direct subscription inquiries and requests for back issues to Customer Services at Cambridge University Press, e-mail: subscriptions_newyork@cambridge.org (USA, Canada, and Mexico) or journals@cambridge.org (outside of USA, Canada, and Mexico).

Postmaster: Send address changes to *Infection Control & Hospital Epidemiology*, Cambridge University Press, One Liberty Plaza, New York, NY 10006 USA.

About the cover:

Starting in 2015, the cover format of each volume of *Infection Control and Hospital Epidemiology* will be changed in order to honor one of the many professionals throughout history who not only recognized how disease might be spread, but also how those principles could be applied to reduce healthcare associated infections.

Wu Lien-teh, M.D., MPH was born Gnoh Lean Tuck in Malaysia in 1879. His father, who was Chinese, immigrated to Penang to work as a goldsmith. In 1896, Wu won the Queen's Scholarship allowing him to enroll at Emmanuel College in Cambridge University. After training at St. Mary's Hospital in London, Wu pursued research at the Liverpool School of Tropical Medicine, the Pasteur Institute, and the Bacteriological Institute of Halle in the fields of bacteriology, malaria, and tetanus. By the age of 24, Dr. Wu was the first student of Chinese descent to graduate from Cambridge with a medical degree.

Dr. Wu returned to Malaysia in 1903, to find that there were no posts in the Medical Service for non-British specialists. After a brief time studying beri-beri, he returned to Penang to establish a medical practice. He advocated for the abolition of gambling, spirits and opium which impacted local government coffers. Wu soon found himself to be in possession of an ounce of opium for which he was prosecuted. In 1907, Wu left Malaysia to accept an invitation to serve as the Vice-Director of Imperial Army Medical College in Tientsin, China.

In 1910, an outbreak of a rapidly fatal respiratory disease occurred in the Chinese-Russian town of Harbin in Manchuria. The outbreak began amongst 10,000 hunters who stayed in crowded inns; they sought marmots for their pelts which, when appropriately dyed, could pass for sable. Wu, being conversant in French and German, was dispatched to work with foreign medical officers. No one had seen pneumonic plague in recent memory, but Dr. Wu strongly suspected the diagnosis and had to overcome Chinese prohibitions against performing postmortems to prove it. With his direction, travel was restricted, plague hospitals were built and the symptomatic isolated, their homes were disinfected, and asymptomatic contacts were identified and quarantined in freight cars. Bodies that could not be buried in the frozen soil were cremated contrary to the teachings of Confucianism. Everyone was encouraged to wear anti-plague masks, the forerunner of the N95 mask. One senior physician who notably refused to wear a mask died of the disease. By the Lunar New Year in 1911, the outbreak had ceased; 60,000 inhabitants had died.

Dr. Wu was nominated for the Nobel Prize for his work as a plague fighter; he directed the National Quarantine Service and was the first president of the China Medical Society. He also championed the modernization of Chinese Medical and Public Health Systems. After the Japanese occupation of China in 1937, he returned to Malaysia where he practiced medicine until retirement at the age of 80. Dr. Wu Lien-teh died on January 20, 1960 following a stroke.
