Entered at New York Post Office as Second Class Matter

Price Six Shillings net

[Issued November 21, 1910]

IMMUNITY IN INFECTIVE DISEASES

by

ÉLIE METCHNIKOFF

Foreign Member of the Royal Society of London, Professor at the Pasteur Institute, Paris

Translated from the French by

FRANCIS G. BINNIE

Of the Pathological Department, University of Cambridge

Royal 8vo. Buckram. Pp. xvi + 592

With 45 figures in the text. Price 18s. net

"The present translation of Prof. Metchnikoff's work has been admirably carried out by Mr Binnie... We have here the record of five and twenty years of thoughtful speculation tested by laborious experiment, and no more important book on the subject has ever appeared in the English language."—*Athenaeum*

"It is a scientific monograph of the first order... It would be impertinent to commend his knowledge of the subject, but it is permissible to remark that he here shows himself an expounder of the first order. His marshalling of the multitudinous details is masterly and so lucid that any one who knows the meaning of the words can follow it with ease. And these qualities are enhanced by the true scientific spirit and scrupulous fairness with which arguments are handled."—*Times*

"The Cambridge University Press has done a real service in publishing Élie Metchnikoff's volume... The book is a work which sums up the labours of a quarter of a century of a life of which fifty years have been devoted to scientific pursuits. What that strenuous life has done for humanity can hardly be over-estimated."—*Westminster Gazette*

A TREATISE ON PLAGUE

Dealing with the Historical, Epidemiological, Clinical,
Therapeutic and Preventive Aspects of the Disease

by

W. J. SIMPSON, M.D. Aberd., F.R.C.P. Lond., D.P.H. Camb.

Professor of Hygiene, King's College, London; Lecturer on Tropical Hygiene, London School of Tropical Medicine; formerly Health Officer, Calcutta; Medical Adviser to the Government of Cape Colony, during the outbreak of Plague in 1901; Commissioner for the Colonial Office to inquire into the causes of the continuance of Plague in Hong Kong.

*Royal 8vo. Buckram. Pp. xxiv + 466. With 6 maps
and 34 illustrations. Price 16s. net*

"Professor Simpson by his wide experience of plague in many countries and in all its bearings and by his personal and scientific attainments is eminently fitted to deal with a subject which he has made peculiarly his own; and he has evidently spared no pains to render his work authoritative, comprehensive, and practical... He has given to the practical physician an accurate guide to the diagnosis and the treatment of plague; the bacteriologist will find here a trustworthy account of the plague bacillus, its nature, its virulence, and its vitality; the sanitarian will read of the way in which to deal practically with an epidemic... In every way the work is worthy of the important subject with which it deals."—*Lancet*

CONTENTS.

No. 1 (April).

	PAGE
COBBETT, L. and GRAHAM-SMITH, G. S. An Investigation of the Pathology of "Grouse Disease." (Plates I—V.)	1
ALEXANDER, D. MOORE. An Investigation into the Acid-fast Bacteria found in Human Faeces with Special Reference to their Presence in Cases of Tuberculosis	37
KAJIURA, S. and ROSENHEIM, O. A Contribution to the Etiology of Beri-Beri. (Plate VI.)	49
HEWLETT, R. TANNER, VILLAR, SIDNEY and REVIS, CECIL. On the Nature of the Cellular Elements Present in Milk. Part II. Quantitative and Qualitative Results. (One Text figure.)	56
BUCHAN, GEORGE F. The Contamination of Ice-cream. (Plate VII.)	93
International Hygiene Exhibition Dresden 1911	131
NICOLLE, CH. Investigations on Typhus Fever	135

No. 2 (August).

HILL, ERNEST and ROSS, G. A. PARK. Epidemic Generalised Vaccinia	137
LOGIE, W. J. The Action of Dysentery Bacilli on Nitrites and Nitrates	143
WILSON, W. J. The Etiology of Typhus Fever	155
WELSH, D. A. and CHAPMAN, H. G. On the Differentiation of Proteins of Closely Related Species by the Precipitin Reaction	177
TODD, CHARLES and WHITE, R. G. On the Haemolytic Immune Isolysins of the Ox and their Relation to the Question of Individuality and Blood-relationship	185
DE SOUZA, ANTONIO, ARRUDA, JACINTHO and PINTO, MANUEL. Report on Experiments undertaken to Discover whether the Common Domesticated Animals of Terceira Island are Affected by Plague	196
BRADLEY, C. H. BURTON. Observations on Leucoprotease and "Anti-leucoprotease." (Two Figures.)	209
O'BRIEN, R. A. Guinea-pigs as Chronic Carriers of an Organism Belonging to the Food-poisoning Group	231

	PAGE
CHICK, HARRIETTE. The Process of Disinfection by Chemical Agencies and Hot Water. (With 21 Text Figures.)	237
PETRIE, G. F. and O'BRIEN, R. A. A Guinea-pig Epizootic Associated with an Organism of the Food-poisoning Group but probably caused by a Filter-passer	287
PUBLICATIONS RECEIVED	306

No. 3, Extra "Plague Number" (November).

REPORTS ON PLAGUE INVESTIGATIONS IN INDIA,
issued by the Advisory Committee.

(Continued from Volume VIII, p. 308.)

XXXIII. The experimental production of plague epidemics among animals. (<i>Third Communication.</i>) (Diagrams I—VII.)	315
XXXIV. Resolving (chronic) plague in rats. (Plate VIII.)	335
XXXV. On the spread of epidemic plague through districts with scattered villages: with a statistical analysis by Dr M. Greenwood. (Maps I—XLVIII.)	349
XXXVI. Observations on rat and human plague in Belgaum. (Maps I—XVII, Plates IX and X, and Charts I—III.)	446
XXXVII. Observations on rat and human plague in Poona. (Maps I—V, Plate XI, and Charts I—VIII.)	483
XXXVIII. Experiments on the vaccination of animals against plague by Dr S. Rowland	536
XXXIX. Interim report by the Advisory Committee	566

No. 4 (December).

BUCHAN, GEORGE F. Typhoid Fever and Mussel Pollution. (1 Chart.)	569
GLENNY, A. T. and WALPOLE, G. S. The Action of Rubber on Mercurial Antiseptic Solutions	586
McCoy, GEORGE W. Plague among Ground Squirrels in America. (Plates XII and XIII, 1 Map.)	589
PETERS, O. H. Observations upon the Natural History of Epidemic Diarrhoea	602
Index of Authors, Vols. I—X (1901—1910)	779
Index of Subjects, Vols. I—X (1901—1910)	794
