This journal is part of the **Cambridge** Core service. Access to online tables of contents and article abstracts is available to all researchers at no cost. Access to full-text articles online is provided to those with online subscription. Online subscriptions must be activated. Once your subscription is activated, free access to past, present, and forthcoming articles is available at:

***Microscopy and Microanalysis* website: cambridge.org/MAM.**

Instructions for authors submitting manuscripts may be found at cambridge.org/MAM. Select "Further Information" then select "Instructions for Contributors."

The best way to get better results

The APEX™ platform is the powerful and user-friendly software that drives the collection and analysis of Energy Dispersive Spectroscopy (EDS) and Electron Backscatter Diffraction (EBSD) data for the compositional and microstructural characterization of materials.

Please visit edax.com/apex for more information.

Faster results from an intuitive user interface

Customizable color schemes and layouts

Best analytical performance for both EDS and EBSD

Easy reporting for the flexible presentation of data

EDAX
Smart Insight

Microscopy and Microanalysis publishes original research papers dealing with a broad range of topics in microscopy and microanalysis. These include articles describing new techniques or instrumentation and their applications, as well as papers in which established methods of microscopy or microanalysis are applied to important problems in the fields of biology or materials science. Microscopy and microanalysis are defined here in a broad sense, and include all current and developing approaches to the imaging and analysis of microstructure. The criteria for acceptance of manuscripts are the originality and significance of the research, the quality of the microscopy or microanalysis involved, and the interest for our readership.

Four types of communications are published in the Journal. **Regular Articles** are of substantial length and describe the findings of an original research project that satisfies the aims and scope of the Journal, described above. **Review Articles** summarize the current status of an important area within the aims and scope of the Journal. **Letters to the Editor** usually contain comments on recent articles that have appeared in the Journal. **Book Reviews** are also published, but these are solicited only through the Book Review Editor.

Instructions for Contributors

Instructions for authors contributing manuscripts may be found at <http://mc.manuscriptcentral.com/mam> under "Resources: Instructions and Forms." Authors may also visit cambridge.org/mam, select "Information," and then select "Instructions for Contributors."

Copyright Information

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the Microscopy Society of America; that the manuscript will not be published elsewhere in any language without the consent of the copyright holders; and that written permission of the copyright holder is obtained by the authors for material used from other copyrighted sources.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names lack protection by the relevant laws and regulation.

Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by Cambridge University Press, provided that the appropriate fee is paid directly to Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA [Tel: (508) 750-8400], stating the ISSN (1431-9276), the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Disclaimer

The Microscopy Society of America, the other societies stated, and Cambridge University Press cannot be held responsible for errors or for any consequences arising from the use of the information contained in this journal. The appearance of scientific reports and/or workshops, or any other material in *Microscopy and Microanalysis* does not constitute an endorsement or approval by The Microscopy Society of America of the findings, data, conclusions, recommendations, procedures, results, or any other aspect of the content of such articles. While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made.

Subscription Information

Microscopy and Microanalysis is published bimonthly in February, April, June, August, October, and December by Cambridge University Press (1 Liberty Plaza, New York, NY 10006). Three supplements (*Meeting Guide*, *Program Guide*, and *Proceedings*) are published in June and August.

Society Rates: Members of the Microscopy Society of America should contact the MSA Business Office for all subscription inquiries: Microscopy Society of America, 11130 Sunrise Valley Dr, Suite 350, Reston, VA 20191, Tel: (703) 234-4115, Email: associationmanagement@microscopy.org, URL: www.microscopy.org. Members of other affiliated societies should contact their respective society business offices for all subscription inquiries.

Subscription Rates: Institutions print and electronic: US \$2364.00 in the USA, Canada, and Mexico; UK £1422.00+VAT elsewhere. Institutions online only: US \$1533.00 in the USA, Canada, and Mexico; UK £928.00 + VAT elsewhere. Individuals print plus online: US \$691.00 in the USA, Canada, and Mexico; UK £420.00+VAT elsewhere. Prices include postage and insurance.

USA, Canada, and Mexico: Subscribers in the USA, Canada, and Mexico should send their orders, with payment in US dollars or the equivalent value in Canadian dollars, to: Cambridge University Press, Customer Services Department (Journals), 1 Liberty Plaza, New York, NY 10006, USA. Tel: (845) 353-7500. Fax: (845) 353-4141. Orders may be phoned direct (toll free): (800) 872-7423. E-mail: journals_subscriptions@cup.org.

Outside North America: Subscribers elsewhere should send their orders, with payment in sterling, to: Customer Services Department (Journals), Cambridge University Press, University Printing House, Shaftesbury Road, Cambridge CB2 8BS, UK. Tel: +44 (0)1223 326070. Fax: 44 (0) 1223 325150. E-mail: journals@cambridge.org

Change of address: Allow six weeks for all changes to become effective. All communications should include both old and new addresses (with postal codes) and should be accompanied by a mailing label from a recent issue. Society members should contact their respective society business offices to inform them of address changes.

Advanced preparation of ultra-thin TEM specimens from sub-20 nm node technologies

- ✓ Optimized dynamic CT for in-situ research and imaging of delicate samples
- ✓ Unique gantry-based design
- ✓ Continuous scanning under 10 seconds per rotation
- ✓ Software tools for 4D acquisition and reconstruction
- ✓ Dynamic screening for synchrotron beamtime

Gate-cut - TEM image of thin specimen from a 10 nm node technology-based IC

Fin-cut - TEM image of thin specimen from a 10 nm node technology-based IC

Cross TEM lamella, showing a thickness of < 10 nm. TEM image of thin specimen from a 10 nm node technology-based IC

Proven Electron Microscopy Solutions

QUANTAX EDS

- Featuring XFlash® 6 – worldwide leading SDD technology for SEM and TEM
- Delivering the fastest, most accurate EDS results
- Easiest-to-use EDS, available in configurations for every budget
- Integration of EDS, WDS, EBSD and Micro-XRF on SEM under a single user interface

BIOLOGICAL APPLICATIONS

- Fluorescence-Based Detection of Membrane Fusion State on a Cryo-EM Grid using Correlated Cryo-Fluorescence and Cryo-Electron Microscopy
Lauren Ann Metskas and John A. G. Briggs 942
- Annexin A2 Enhances the Progression of Colorectal Cancer and Hepatocarcinoma via Cytoskeleton Structural Rearrangements
Huimin He, Li Xiao, Sinan Cheng, Qian Yang, Jinmei Li, Yifan Hou, Fengying Song, Xiaorong Su, Huijuan Jin, Zheng Liu, Jing Dong, Ruiye Zuo, Xigui Song, Yanyan Wang, Kun Zhang, Wei Duan and Yingchun Hou 950
- Live Imaging and Analysis of Vasoactive Properties of Drugs Using an *in-ovo* Chicken Embryo Model: Replacing and Reducing Animal Testing
Akila Swaminathan, Uma Maheswari Balaguru, Reji Manjunathan, Srinivasan Bhuvaneshwari, Dharanibalan Kasiviswanathan, Bandi Srishakalyani, Prasunpriya Nayak and Suvro Chatterjee 961
- Image-based Characterization of 3D Collagen Networks and the Effect of Embedded Cells
Vanesa Olivares, Mar Córdor, Cristina Del Amo, Jesús Asín, Carlos Borau and José Manuel García-Aznar 971
- Application of Gray Level co-Occurrence Matrix Algorithm for Detection of Discrete Structural Changes in Cell Nuclei After Exposure to Iron Oxide Nanoparticles and 6-Hydroxydopamine
Dubravka Nikolovski, Jelena Cumic and Igor Pantic 982
- Evaluation of Nanomechanical Properties of Tomato Root by Atomic Force Microscopy
D. E. Nicolás-Álvarez, J. A. Andraca-Adame, J. J. Chanona-Pérez, J. V. Méndez-Méndez, S. Cárdenas-Pérez and A. Rodríguez-Pulido 989
- Combined Confocal Laser Scanning Microscopy Techniques for A Rapid Assessment of the Effect and Cell Viability of *Scenedesmus* sp.DE2009 Under Metal Stress
Laia Millach, Eduard Villagrasa, Antonio Solé and Isabel Esteve 998

MICROGRAPHIA

- Autophagy and Apoptosis in the Midgut Epithelium of Millipedes
M.M. Rost-Roszkowska, J. Vilimová, K. Tajovský, A. Chachulska-Żymelka, A. Sosinka, M. Kszuk-Jendrysik, A. Ostróžka and F. Kaszuba 1004
- Morphological Characteristics of the Developing Cecum of Japanese Quail (*Coturnix coturnix japonica*)
Aalaa M. AbuAli, Doaa M. Mokhtar, Reda A. Ali, Ekbal T. Wassif and K. E. H. Abdalla 1017
- Ultrastructural Imaging Analysis of the Zona Pellucida Surface in Bovine Oocytes
Francisco Báez, Álvaro A. Camargo and Gustavo D.A. Gastal 1032
- Characterizing the Image Forming Particles of Modern Ungilded Daguerreotypes Using XRD and SEM
Patrick Ravines and Alexander Y. Nazarenko 1037
- Seasonal Variation of the Intraepithelial Gland in Camel Epididymis with Special Reference to Autophagosome
Fatma M. Abdel-Maksoud, Manal T Hussein and Abdelraheim Attaai 1052
- Microanalytical Study of Ancient Gold Jewelry: Mediterranean Impact on the Early Iron Age Technology in Southwestern Iberia
Pedro Valério, Rui J.C. Silva, António M.M. Soares, M. Fátima Araújo, Lídia Baptista and Ever Calvo 1061

Nano-Positioning for Microscopy & Imaging

PIFOC® nano-focusing drive

Piezo stages & positioners are essential tools for high-resolution microscopy, such as Super Resolution Microscopy or AFM. Their sub-atomic resolution and extremely fast response allow researchers to create higher-quality images faster. PI provides a large variety of fast positioning stages and piezo objective nano-positioners for 3D imaging (Z-stack acquisition), fast-focusing applications, and light sheet microscopy.

See PI's solutions in Booth 421 at

SPIE
OPTICS+
PHOTONICS

Piezo flexure actuators excel in applications from fast nano-dosing to precision alignment.

Affordable XY & XYZ Piezo Stages for SR Microscopy: P-545 PInano®

PI designs and manufactures precision motion systems at locations in the USA, Europe, and Asia. With over 40 years of experience developing standard and custom products based on piezoceramic and electromagnetic drives and more than 1,300 employees in 13 countries, PI can quickly provide a solution for your positioning and automation projects in industry and research.

PRECISION | SPEED | STABILITY - MOTION CONTROL & POSITIONING SOLUTIONS

Revolutionizing Digital Documentation

ZEISS Axiolab 5

// INNOVATION
MADE BY ZEISS

Your smart microscope for more efficient routine lab work

Axiolab 5 is made for the daily work in your lab. Combine it with Axiocam 208 color and take full advantage of the smart microscopy concept: you'll be experiencing a completely new way of digital documentation. Just focus your sample and press a single button for crisp images in true color. The digital image will look exactly like you see it through the eyepieces, with all the details and subtle color differences clearly visible. Plus, Axiolab 5 automatically adds the correct scaling information to your images. All of this works without a PC or separate controller. Digital documentation has never been easier and faster.

www.zeiss.com/axiolab
