BENTHAM AND LEGAL THEORY

edited by M. H. James

Recent progress on the Bentham Project, under the general editorship of Professor J. H. Burns, has established the significance of much of Bentham's hitherto unpublished or neglected writings on legal theory. In this collection, specialists in several disciplines, some of whom are directly involved on the Bentham Project, come together to explore some of the directions in which Bentham's contribution to legal theory might be re-assessed.

Contents: 'Bentham's Principle of Utility and Legal Philosophy'—A. J. M. Milne
'Bentham on Torture'—W. L. Twining
'Bentham on the Individuation of Laws'—M. H. James
'Bentham on the Aspects of a Law'—L. J. Lysagt
'Bentham on Sovereignty: an Exploration'—J. H. Burns

J. H. Burns is Professor of the History of Political Thought at University College London, and General Editor of the Bentham Project.

M. H. James is Lecturer in Political Science at the Queen's University of Belfast.

L. J. Lysagt is Associate Professor of Law at the University of Detroit.

A. J. M. Milne is Professor of Social Philosophy at the Queen's University of Belfast.

W. L. Twining is Professor of Law at the University of Warwick, and an editor on the Bentham Project.

Available from October 1973

TOWARDS PEACE IN MIND AND HEALTH IN BODY

O. J. Kenward

"This book is based entirely upon Fellowship of Meditation teaching. It is written, not for our own members already conversant with the subject, but in the hope of its being stocked by libraries and booksellers and thus winning new adherents." O. J. Kenward.

A simple way of physical healing and of succour in life generally, has been in use during a period of time, and by large numbers of people, to justify wider interests in it. The object of this book is to encourage all and sundry to try out a method for themselves. It requires no special or intellectual gifts, nor the individual powers of professional "healers". Its strongest recommendation is that, faithfully followed, the method has proved efficacious in the lives of its adherents. Crown octavo 116 pages 43p from your bookseller or 50p (including postage) direct from publishers:

NEW FROM YALE

Analogy and Philosophical Language

DAVID BURRELL, C.S.C.

Starting with the premise that philosophy is activity rather than doctrine, David Burrell uses analogy as a test case for rethinking many traditional philosophical issues. He views the classical literature on analogy from a contemporary perspective and finds that this tradition has much to teach philosophers who work within the analytic framework.

He focuses on four major philosophers—Plato, Aristotle, Aquinas and Scotus. He examines what they do when they philosophize and the relation between their questions and answers; then he investigates their criteria for the responsible use of analogous expressions.

£4.00

The Origin of Subjectivity

An Essay on Descartes

HIRAM CATON

Hiram Caton's examination of the Cartesian origin of modern rationalism is a significant contribution to philosophy. Today's deteriorating confidence in rationalism makes his task more imperative than ever. He urges the priority of Descartes' scientific views and endorses Descartes' title as the father of modern philosophy.

Mr Caton joins a small but distinguished minority of commentators who maintain that Descartes' ethical thought is consciously hostile to classical and Christian ethics. His broad, clear study poses a challenge to much of the work done in the past decades.

POLITICAL THINKERS: No.1

General Editor: Geraint Parry

HEGEL

Raymond Plant

Dr Plant's stimulating book is the first concise study of Hegel's political thought for many years. Most of the previous commentaries on Hegel's social and political writings tended to isolate his discussions of political life and institutions from his central philosophical concerns.

Dr Plant's achievement is to demonstrate the interconnection between the political and metaphysical writings, thereby providing the student with a point of entry into Hegel's system of ideas. He emphasises that these metaphysical writings are permeated by certain broad political concerns—the decline of the community in the modern world, the general fragmentation of modern culture, the baneful social effects of much contemporary theology—and that these concerns stand at the very heart of Hegel's thinking.

Indeed far from Hegel's political thinking being a detachable addendum to a metaphysical system, his metaphysics is itself socially and politically engaged. Dr Plant proceeds to trace the development and elaboration of this political commitment from Hegel's early theological writings to the philosophical and political masterpieces of his maturity, showing in a novel way the continuity of Hegel's thought.

This interpretation of Hegel's thought will be of importance to students and teachers of philosophy and political theory, and, because of its insistence on the deep connections in Hegel's mind between an adequate political culture and an adequate theology, it will be of interest to theologians. Anyone interested in the political and cultural problems of modern society or wishing to understand some of the rapidly developing careers of contemporary social philosophers will be helped by this lucid analysis of Hegel.

Dr Plant is at present Chairman of the Department of Philosophy in the University of Manchester. His book is the first in a series which will contain volumes on Bentham, Burke, Locke, Machiavelli, Marx, Mill and others.

£3.75: paperback £2.00

GEORGE ALLEN & UNWIN

Oxford Books for Students

Mind in Action

An Essay in Philosophical Psychology

C. H. Whiteley

The author's concern is to refute the arguments for the view that human consciousness and purposive action cannot be causally explained. The topics he discusses include behaviourism; the concepts of desire, will and intention; the relation between causes, reasons, and purposes; the mind-brain identity-theory; the freedom of will; and what constitutes personal identity. £1.20 paper covers 55p
OPUS

The Liberal Theory of Justice

A Critical Examination of the Principal Doctrines in *A Theory of Justice*
by John Rawls

Brian Barry

Dr Barry places Rawls's theory in its intellectual context, examines Rawls's claim to have provided a logical deduction of two 'principles of justice', and discusses the most important of Rawls's economic and political deductions. A concordance is provided to help those wishing to read the two books in conjunction. 7 text figures £3 paper covers 95p

The Philosophy of Education

Edited by R. S. Peters

This book concentrates on philosophical problems specific to the philosophy of education: the nature and relevance of education; the content of the curriculum; learning, teaching, and the relationship between them; and the justification of education. Paper covers £1.10 *Oxford Readings in Philosophy*

Aesthetics

Edited by Harold Osborne

Paper covers 75p *Oxford Reading 3 in Philosophy*

For further information on these or other Oxford books in this field, please write to Oxford University Press (UPS), Ely House, 37 Dover Street, London W1X 4AH

Oxford Books for Students

Democracy and Disobedience

P.A.D. Singer

'*Democracy and Disobedience* is a splendid little book. It ought to be read with pleasure, not only by students of philosophy, but by anyone who doubts whether philosophers have anything useful to say about practical issues.'—*The T.L.S.*
£2 paper covers 90p

The Philosophy of Social Explanation

Edited by Alan Ryan

Paper covers 80p *Oxford Readings in Philosophy*

The Philosophy of Rousseau

Ronald Grimsley

This book concentrates on the exposition of Rousseau's principal ideas, dealing first with his criticism of society in the two *Discourses* and the *Letter to d'Alembert*, and then with his constructive attempts in *Émile* to analyse the essential features of human nature. There follows an account of Rousseau's ideas on religion, political philosophy, and art; a final section indicates the main philosophical aspects of the *Confessions* and other personal writings. £1.40 paper covers 65p OPUS

What is Mathematical Logic?

J. N. Crossley and others

Non-mathematicians can read this lively book as a general survey; students of the subject will find it a stimulating introduction. Gödel's theorems, computability and recursive functions, and consistency and independence in axiomatic set theory, are explained simply and clearly. Text figures throughout £1.40 paper covers 70p OPUS

Elementary Logic

Benson Mates

For this new edition of his introduction to formal logic, Professor Mates has made a number of corrections and improvements to the first edition. The extent and variety of exercises have been considerably increased, and a section added in which a proof procedure is set forth for the first order predicate calculus. Second edition numerous examples £3

Oxford Essays in Jurisprudence

Second Series

Edited by A. W. B. Simpson

This volume contains eleven essays (all but one previously unpublished) dealing with central and controversial issues in jurisprudence. The emphasis this time is on legal theory, and the collection should be of particular interest to students of political philosophy as well as to law students and philosophers generally. £3.50

Science and Sentiment in America

**Philosophical Thought from
Jonathan Edwards to John Dewey**

Morton White

In this study of American philosophy the author examines several different views of science espoused by major American thinkers and shows how these views affected their attitudes toward the central institutions of civilization. £4 paper covers £1.40 *Galaxy Books OUP New York*

Pragmatism and the American Mind

**Essays and Reviews in Philosophy
and Intellectual History**

Morton White

Morton White here attempts to show how ideas and their history may be illuminated by an analytical philosopher; and also how such a philosopher can contribute to the revolution or clarification of fundamental problems of civilized life. £4 *OUP New York*

Illustrations on the Moral Sense

Francis Hutcheson

Edited by Bernard Peach

The writings of Francis Hutcheson played a central role in the development of British moral philosophy in the eighteenth century. His *Illustrations on the Moral Sense* is significant not only historically but also for its exploration of problems of concern in contemporary ethics. £4 *Harvard*

Oxford
