CAMBRIDGE

Introductory Econometrics for Finance

3rd Edition

By Chris Brooks

This best-selling and thoroughly classroom-tested textbook is a complete resource for finance students.

A comprehensive and illustrated discussion of the most common empirical approaches in finance prepares students for using econometrics in practice, while detailed financial case studies help them understand how the techniques are used in relevant financial contexts.

Paperback | 9781107661455
£48.00 / \$80.00

Hardback | 9781107034662
£99.00 / \$160.00

Also available in eBook

Key Features

- A complete package for finance students - assumes no background in econometrics.
- Includes worked examples on how to conduct events studies and the Fama-MacBeth method, two of the most common empirical approaches in finance, ensuring that students are well-prepared for econometrics in practice.
- Incorporates data, tutorials and screenshots from the most recent version of the statistical software EViews.
- Includes full web support for students and instructors, with data sets, multiple choice question bank with detailed feedback, lecture slides, and links to sources of financial data and articles.

CAMBRIDGE
UNIVERSITY PRESS

JFQA Style Requirements

Submit manuscripts online at www.jfqa.org. Manuscripts must be double-spaced and single-sided on 8.5" × 11" paper. The cover page must show title, author name(s) and affiliation(s), e-mail address(es), and work phone number(s). The first page of text should include the title and a one-paragraph abstract of no more than 100 words. All sections of the paper, beginning with the introduction and ending with a conclusion or summary, must be numbered with Roman numerals. Subsection headings must be lettered A, B, C, etc.

The manuscript should explain its relation to other research in the field, especially recently published material. References cited in the text should be noted by the last name(s) of the author(s) followed by the publication year enclosed in parentheses without punctuation: Smith (1988). When a particular page, section, or equation is referred to, the reference also should be placed within parentheses: (Smith and Jones (1988), p. 222), (Green (1988a), eq. 3).

Lengthy mathematical proofs and extensive tables should be placed in an appendix or omitted from the manuscript entirely. In the latter case, the author may indicate in a footnote that proofs or tables are available from the author. The author should make every effort to explain the meaning of mathematical proofs.

The author should check the manuscript for clarity, grammar, spelling, and punctuation to minimize editorial changes and the necessity of extensive corrections at the proof stage. All abbreviations must be defined.

Equations. All but very short mathematical expressions should be displayed on a separate line and centered. Important displayed equations must be identified by consecutive Arabic numerals in parentheses on the left. Expressions should be aligned, and subscripts and superscripts clearly marked to avoid confusion.

Tables. Each table must be titled and numbered consecutively with Arabic numerals. Please check the text to make sure there is a reference to each table. General footnotes should be marked a, b, c, etc., for specific footnotes. Asterisks * or ** indicate significance at the 5% and 1% levels, respectively. The author should check tables to be sure that totals are correct and that the title, column headings, and footnotes clearly explain the content of the table. If tables are on separate pages at the end of the article, indicate approximate placement within the text.

Figures. Figures must be titled and numbered consecutively with Arabic numerals. Captions should present sufficient information to describe the purpose of the figure. Figures for accepted manuscripts must be of professional quality and ready for reproduction.

Footnotes. Footnotes must be double-spaced. Footnotes must not be used for the purpose of citation. Footnotes with extensive content should be avoided.

References. All works cited in the text must be alphabetically arranged in a double-spaced list at the end of the manuscript. Examples:

Brown, S., and J. Warner. "Using Daily Stock Returns: The Case of Event Studies." *Journal of Financial Economics*, 14 (1985), 1–31.

Ross, S. A. "Return Risk and Arbitrage." In *Risk and Return in Finance*, Vol. I, I. Friend and J. L. Bicksler, eds. Cambridge, MA: Ballinger (1977).

Titman, S.; K. C. Wei; and F. Xie. "Capital Investments and Stock Returns." *Journal of Financial and Quantitative Analysis*, 39 (2004), 677–700.

STATEMENT OF OWNERSHIP, MANAGEMENT, AND CIRCULATION

The Journal of Financial and Quantitative Analysis (ISSN 0022-1090) is published bimonthly (6 issues per year) by Cambridge University Press, a nonprofit organization located at 32 Avenue of the Americas, New York, NY 10013-2473, for the University of Washington Michael G. Foster School of Business, located at 370 Mackenzie Hall, Box 353200, Seattle, WA 98195-3200. The Managing Editors are Jarrad Harford and Paul Malatesta, Michael G. Foster School of Business, University of Washington, 370 Mackenzie Hall, Box 353200, Seattle, WA 98195-3200. There are no known bondholders, mortgagees, or other security holders owning or holding 1% or more of the total amount of bonds, mortgages, or other securities. The purpose, function, and nonprofit status of this organization and the exempt status for federal income tax purposes have not changed during the preceding 12 months. The annual subscription price for the Journal of Financial and Quantitative Analysis is \$520 for institutions and \$85/\$100 for individuals. During the preceding 12 months, the average number of copies printed for each issue was 1,316; the average paid circulation 1,010; the average free distribution 13; the average number of copies distributed 1,023. Corresponding figures for the last issue before filing: total number of copies printed 1,231; total paid circulation 943; free copies distributed 12; total distribution 955. Average percent paid 99%; actual percent paid 99%.

I certify that the statements made by me above are correct and complete.

Helen Sunakawa

Business Manager
