INTERNATIONAL GLACIOLOGICAL SOCIETY

The Society was founded in 1936 to provide a focus for individuals interested in practical and scientific aspects of snow and ice. Membership is open to all individuals who have a scientific, practical or general interest in aspects of snow and ice study.

Papers on glaciology are printed in the *Journal of Glaciology*, which is published six times a year. The Society also publishes the *Annals of Glaciology*, a peer-reviewed, thematic journal, two to four times a year. The Society's news bulletin, *ICE*, is published three times a year.

The Society sponsors symposia, meetings and workshops in many countries throughout the year.

Journal of Glaciology publishes original articles and letters concerning scientific research into any aspect of ice and snow, and interactions between ice, snow, climate and other environmental phenomena including the biosphere and permafrost. Research techniques described in the Journal include, for example, field studies, remote sensing, computer modelling and laboratory studies. Research topics include the nature of and changes in mountain glaciers and ice sheets, including former ice sheets. For example, ice cores extracted from the glaciers and ice sheets reveal detailed information on past atmospheric composition and climate, and changes in the extent and thickness of the ice sheets are also related to climate change. The physical, chemical and crystallographic properties of ice and snow are included, especially but not only as they relate to the flow of ice and to past climate. The Journal also publishes studies of sea ice, and of icebergs, along with their interactions with climate on shorter time scales, and with the ocean. Snow and avalanche research is included in the Journal, with several recent articles investigating avalanche dynamics. Snow and ice on other planets is also within the realm of the Journal of Glaciology, as are studies of atmospheric ice.

Journal of **GLACIOLOGY**

CONTENTS Vol 65 No 250 2019

- 173 **Simon Filhol, Matthew Sturm**
The smoothing of landscapes during snowfall with no wind
- 188 **L. Carturan, F. Cazorzi, G. Dalla Fontana, T. Zanoner**
Automatic measurement of glacier ice ablation using thermistor strings
- 195 **Christian Kienholz, Jason M. Amundson, Roman J. Motyka, Rebecca H. Jackson, John B. Mickett, David A. Sutherland, Jonathan D. Nash, Dylan S. Winters, William P. Dryer, Martin Truffer**
Tracking icebergs with time-lapse photography and sparse optical flow, LeConte Bay, Alaska, 2016–2017
- 212 **Julia Christmann, Ralf Müller, Angelika Humbert**
On nonlinear strain theory for a viscoelastic material model and its implications for calving of ice shelves
- 225 **Hakime Seddik, Ralf Greve, Daiki Sakakibara, Shun Tsutaki, Masahiro Minowa, Shin Sugiyama**
Response of the flow dynamics of Bowdoin Glacier, northwestern Greenland, to basal lubrication and tidal forcing
- 239 **Lin Liu, Liming Jiang, Yongling Sun, Hansheng Wang, Yafei Sun, Houze Xu**
Diurnal fluctuations of glacier surface velocity observed with terrestrial radar interferometry at Laohugou No. 12 Glacier, western Qilian mountains, China
- 249 **Philip Crivelli, Enrico Paterna, Michael Lehning**
Spatiotemporal dynamics of snow erosion, deposition and horizontal mass flux
- 263 **Jakob Abermann, Dirk Van As, Stefan Wacker, Kirsty Langley, Horst Machguth, Robert Schjøtt Fausto**
Strong contrast in mass and energy balance between a coastal mountain glacier and the Greenland ice sheet
- 270 **Sher Muhammad, Lide Tian, Marcus Nüsser**
No significant mass loss in the glaciers of Astore Basin (North-Western Himalaya), between 1999 and 2016
- 279 **Qi Liang, Chunxia Zhou, Ian M. Howat, Seongsu Jeong, Ruixi Liu, Yiming Chen**
Ice flow variations at Polar Record Glacier, East Antarctica
- 288 **Julius Rix, Robert Mulvaney, Jialin Hong, Dan Ashurst**
Development of the British Antarctic Survey Rapid Access Isotope Drill
- 299 **Rossana Serandrei-Barbero, Sandra Donnici, Stefano Zecchetto**
Projected effects of temperature changes on the Italian Western Tauri glaciers (Eastern Alps)
- 309 **Yushan Zhou, Zhiwei Li, Jia Li, Rong Zhao, Xiaoli Ding**
Geodetic glacier mass balance (1975–1999) in the central Pamir using the SRTM DEM and KH-9 imagery
- 321 **Rebecca Dell, Rachel Carr, Emrys Phillips, Andrew J. Russell**
Response of glacier flow and structure to proglacial lake development and climate at Fjallsjökull, south-east Iceland
- 337 **Grant J. Macdonald, Alison F. Banwell, Ian C. Willis, David P. Mayer, Becky Goodsell, Douglas R. MacAyeal**
Formation of pedestalled, relict lakes on the McMurdo Ice Shelf, Antarctica
- 344 **Daniela Festi, Werner Kofler, Klaus Oegg**
Comments on Brugger and others (2018) ‘A quantitative comparison of microfossil extraction methods from ice cores’
