

INTERNATIONAL ECONOMIC LAW IN THE ERA OF DATAFICATION

This book addresses the challenges of datafication through the lens of international economic law. We are undergoing a wave of datafication practices. If such practices simply continue to evolve without being examined and repaired along the existing path of development, the same issues will continue to accumulate and will more than likely be amplified. The unprecedented economic and social influence of big tech has served as the catalyst for the concept of “digital sovereignty,” which is rooted in the need to safeguard regulatory autonomy in a datafied world. The current wave of data-driven innovations has placed the policy debates on digital trade and data governance into an even more challenging context. The book’s chapters are connected by the many facets of “data” and systematically explain how international economic law can reduce the perils of datafication instead of increasing them. This title is part of the Flip it Open Programme and may also be available Open Access. Check our website Cambridge Core for details.

SHIN-YI PENG is Distinguished Professor of Law at National Tsing Hua University. Professor Peng is a member of the Indicative List of Panelists for resolving WTO disputes. She has served as vice president of the Society of International Economic Law. In Taiwan, she is a former commissioner of the National Communications Commission, and the recipient of the Outstanding Research Awards from the National Science and Technology Council.

CAMBRIDGE INTERNATIONAL TRADE AND ECONOMIC LAW

McGill University, Montréal

Processes of economic regionalisation and globalisation have intensified over the last decades, accompanied by increases in the regulation of international trade and economics at the levels of international, regional and national laws. At the same time, significant challenges have arisen with respect to economic liberalization, rule-based systems of trade and investment, and their political and social impacts. The subject matter of this series is international economic law, in this contemporary context. Its core is the regulation of international trade, investment, finance and cognate areas such as intellectual property and competition policy. The series publishes books on related regulatory areas, in particular human rights, labour, environment and culture, as well as sustainable development. These areas are horizontally interconnected and vertically linked at the international, regional and national levels. The series also includes works on governance, dealing with the structure and operation of international organisations related to the field of international economic law, and the way they interact with other subjects of international and national law. The series aims to include excellent legal doctrinal treatises, as well as cutting-edge interdisciplinary works that engage law and the social sciences and humanities.
