

## INSTRUCTIONS FOR CONTRIBUTORS

### SUBMISSION OF MANUSCRIPTS

Manuscripts should be submitted online via our manuscript submission and tracking site, <http://www.editorialmanager.com/psm/>. Full instructions for electronic submission are available directly from this site. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current e-mail address when registering to use the system.

Papers for publication from Europe (except those on genetic topics, irrespective of country), and all papers on imaging topics, should be submitted to the UK Office.

Papers from the Americas, Asia, Africa, Australasia and the Middle East (except those dealing with imaging topics), and all papers dealing with genetic topics, irrespective of country, should be sent to US Office.

Generally papers should not have text more than 4500 words in length (excluding these sections) and should not have more than a combined total of 5 tables and/or figures. Papers shorter than these limits are encouraged. For papers of unusual importance the editors may waive these requirements. A structured abstract of no more than 250 words should be given at the beginning of the article using the headings: Background; Methods; Results; Conclusions. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

**Declaration of Interest:** A statement must be provided in the acknowledgements listing all financial support received for the work and, for all authors, any financial involvement (including employment, fees, share ownership) or affiliation with any organization whose financial interests may be affected by material in the manuscript, or which might potentially bias it. This applies to all papers including editorials and letters to the editor.

Contributors should also note the following:

1. S.I. units should be used throughout in text, figures and tables.
2. Authors should spell out in full any abbreviations used in their manuscripts.
3. Foreign quotations and phrases should be followed by a translation.
4. If necessary, guidelines for statistical presentation may be found in: **Altman DG, Gore SM, Gardner MJ & Pocock SJ** (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

**REFERENCES** (1) The Harvard (author-date) system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by et al. (but the names of all of the authors should be given in the References section). Where several references are cited together they should be listed in rising date order. (2) The References section should be supplied in alphabetical order (authors' names in **bold**, journal titles in full), following the text. Some examples follow:

**Miller PM, Byrne M, Hodges A, Lawrie SM, Johnstone EC** (2002). Childhood behaviour, psychotic symptoms and psychosis onset in young people at high risk of schizophrenia: early findings from the Edinburgh high risk study. *Psychological Medicine* **32**, 173–179.

**Cleckley HJ** (1941). *The Mask of Sanity*, 2nd edn. Mosby: St. Louis, MO.

**Brewer WJ, Wood SJ, DeLuca C, Pantelis C** (2006). Models of olfaction for exploring neurodevelopment. In *Olfaction and the Brain* (ed. W. J. Brewer, D. Castle and C. Pantelis), pp. 97–121. Cambridge University Press: Cambridge.

(3) Online citations

*doi (when published online prior to printed issue)*

**Lauritsen MB, Pedersen CB, Mortensen CB** (2004). The incidence and prevalence of pervasive developmental disorders: a Danish population-based study. *Psychological Medicine*. Published online: 21 October 2004. doi:10.1017/S0033291704002387.

Accessed 15 February 2006.

[Authors are requested to print-out and keep a copy of any online-only material, in case the URL changes or is no longer maintained.]

**FIGURES AND TABLES** Only essential figures and tables should be included. Further tables, figures, photographs and appendices, may be included with the online version on the journal website. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal. **Line artwork:** Format: tif or eps, Colour mode: black and white (also known as 1-bit), Resolution: 1200 dpi; **Combination artwork (line/tone):** Format: tif or eps, Colour mode: grayscale (also known as 8-bit), Resolution: 800 dpi; **Black and white halftone artwork:** Format: tif, Colour mode: grayscale (also known as 8-bit), Resolution: 300 dpi; **Colour halftone artwork:** Format: tif, Colour mode: CMYK colour, Resolution: 300 dpi. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in Arabic numerals. Captions for figures should be typed double-spaced on separate sheets. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

**PROOFS AND OFFPRINTS** Page proofs will be sent to the author designated to receive correspondence. corrections other than to printer's errors may be charged to the author. The corresponding author of each paper will receive a PDF file of their article and hard copy offprints may be purchased if they are ordered on the form supplied when the proof is returned.

# PSYCHOLOGICAL MEDICINE

## CONTENTS

### REVIEW ARTICLES

**Embracing polygenicity: a review of methods and tools for psychiatric genetics research**  
Maier RM, Visscher PM, Robinson MR & Wray NR 1055

**Treating depression with physical activity in adolescents and young adults: a systematic review and meta-analysis of randomised controlled trials**  
Bailey AP, Hetrick SE, Rosenbaum S, Purcell R & Parker AG 1068

### INVITED REVIEW

**Fact or fiction: reducing the proportion and impact of false positives**  
Stahl D & Pickles A 1084

### ORIGINAL ARTICLES

**Altered fear processing in adolescents with a history of severe childhood maltreatment: an fMRI study**  
Hart H, Lim L, Mehta MA, Simmons A, Mirza KAH & Rubia K 1092

**Metabolic and inflammatory markers: associations with individual depressive symptoms**  
Lamers F, Milaneschi Y, de Jonge P, Giltay EJ & Penninx BWJH 1102

**Quality of life in bipolar disorder: towards a dynamic understanding**  
Morton E, Murray G, Michalak EE, Lam RW, Beaulieu S, Sharma V, Cervantes P, Parikh SV & Yatham LN 1111

**Suicide risk assessment among psychiatric inpatients: a systematic review and meta-analysis of high-risk categories**  
Large M, Myles N, Myles H, Corderoy A, Weiser M, Davidson M & Ryan CJ 1119

**Diminished medial prefrontal cortex activation during the recollection of stressful events is an acquired characteristic of PTSD**  
Dahlgren MK, Laifer LM, VanElzakker MB, Offringa R, Hughes KC, Staples-Bradley LK, Dubois SJ, Lasko NB, Hinojosa CA, Orr SP, Pitman RK & Shin LM 1128

**Distinguishing postpartum and antepartum depressive trajectories in a large population-based cohort: the impact of exposure to adversity and offspring gender**  
Denckla CA, Mancini AD, Consedine NS, Milanovic SM, Basu A, Seedat S, Spies G, Henderson DC, Bonanno GA & Koenen KC 1139

**Changes in resting-state brain networks after cognitive-behavioral therapy for chronic pain**  
Yoshino A, Okamoto Y, Okada G, Takamura M, Ichikawa N, Shibasaki C, Yokoyama S, Doi M, Jinnin R, Yamashita H, Horikoshi M & Yamawaki S 1148

**Childhood stress, grown-up brain networks: corticolimbic correlates of threat-related early life stress and adult stress response**  
Kaiser RH, Clegg R, Goer F, Pechtel P, Beltzer M, Vitaliano G, Olson DP, Teicher MH & Pizzagalli DA 1157

**Prevalence and clinical relevance of interview-assessed psychosis-risk symptoms in the young adult community**  
Frauke Schultze-Lutter, Chantal Michel, Stephan Ruhrmann & Benno G Schimmelmann 1167

**Relating ASD symptoms to well-being: moving across different construct levels**  
Deserno MK, Borsboom D, Begeer S & Geurts HM 1179

**Adverse life events, psychiatric history, and biological predictors of postpartum depression in an ethnically diverse sample of postpartum women**  
Guintivano J, Sullivan PF, Stuebe AM, Penders T, Thorp J, Rubinow DR & Meltzer-Brody S 1190

**Genetic risk scores and family history as predictors of schizophrenia in Nordic registers**  
Lu Y, Pouget JG, Andreassen OA, Djurovic S, Esko T, Hultman CM, Metspalu A, Milani L, Werge T & Sullivan PF 1201

**Specific amygdala response to masked fearful faces in post-traumatic stress relative to other anxiety disorders**  
Neumeister P, Feldker K, Heitmann CY, Buff C, Brinkmann L, Bruchmann M & Straube T 1209

**Correspondence** 1218, 1220, 1221

**Corrigendum** 1224
