

Contents of No. 283, September 1968

MARIE LINDBERG SMITH and CLIFFORD FRONDEL: The related layered minerals ganophyllite, bannisterite, and stilpnomelane	page 893
P. GAY and N. N. ROY: The mineralogy of the potassium-barium feldspar series III: Subsolidus relationships	914
R. E. WINCHELL and H. E. WENDEN: Synthesis and study of diabolite	933
P. BAYLISS and N. C. STEPHENSON: The crystal structure of gersdorffite (III), a distorted and disordered pyrite structure	940
P. A. SABINE: Ferrian chlorospinel from Carneal, Co. Antrim	948
MARTA WYDERKO and EUGENIUSZ MAZANEK: The mineralogical characteristics of calcium-iron olivines	955
K. L. CHAKRABORTY: Mineralogical note on the chrome-chlorite (kämmererite) and chrome-garnet (uvarovite) from the chromite deposits of Kalrangi, Orissa, India	962
P. H. RIBBE, G. V. GIBBS, and NORRIS W. JONES: Cation and anion substitutions in the humite minerals	966
LESLEY S. DENT GLASSER and IAN B. SMITH: Oriented transformations in the system $MnO-O-H_2O$	976
FERGUS G. F. GIBB: On the origin of translation lamellae in olivine	988
LUKE L. Y. CHANG: Subsolidus phase relations in the system $ZnWO_4-ZnMoO_4-MnWO_4-MnMoO_4$	992
BRIAN MASON: Kaersutite from San Carlos, Arizona, with comments on the paragenesis of this mineral	997
G. N. KIROV and C. N. POULIEFF [Г. Н. Киров и К. Н. Пулиев]: On the infra-red spectrum and thermal decomposition products of thaumasite, $Ca_3H_2(CO_3/SO_4)SiO_4 \cdot 13H_2O$	1003
GEORGE BAKER: Micro-forms of hay-silica glass and of volcanic glass	1012
J. B. WRIGHT: Oligoclase-andesine phenocrysts and related inclusions in basalts from part of the Nigerian Cenozoic province	1024
R. V. SATHE: Grossular-spessartine garnet from Goldongri, Panchmahal, Gujrat State, India	1032
SUBIMAL SINHA ROY: Vredenburgite from the peroxide manganese ores of Dongri Buzurg, Maharashtra, India	1034
