Publisher: Katy Christomanou

Special sales and supplements:

This Journal accepts relevant advertisements and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplements on behalf of academic and corporate collaborators. Please contact Sarah Maddox at the Cambridge address for further details. E-mail: special_sales@cambridge.org

Subscription information:

British Journal of Nutrition is an international journal published by Cambridge University Press on behalf of The Nutrition Society. The twelve issues starting January 2012 comprise Volume 107, the twelve issues starting July 2012 comprise Volume 108.

Annual subscription rates:

Volumes 107/108 (24 issues):
Internet/print package £1113/\$2169/€1782
Internet only: £877/\$1710/€1401
Print only: £1060/\$2067/€1723

Any **supplements** to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Back volumes are available. Please contact Cambridge University Press for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

US POSTMASTERS: please send address corrections to *British Journal of Nutrition*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994-2133.

Directions to Contributors are available from the Society at the address below or can be found on the Society's website at <http://www.nutrition society.org> (an abbreviated Notes for Authors can be found inside the back cover).

Offprints: The author (or main author) of an accepted paper will receive a copy of the PDF file and a voucher copy of the issue in which their paper has been published. There will be an option to purchase paper offprints, these should be ordered at proof stage. No page charges are levied by this journal.

Copyright: As of 1 July 2000 the copyright of all articles submitted to *British Journal of Nutrition* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Publications Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, Hammersmith, London W6 7NJ, UK.

Disclaimer: The information contained herein, including any expression of opinion and any projection or forecast, has been obtained from or is based upon sources believed by us to be reliable, but is not guaranteed as to accuracy or completeness. The information is supplied without obligation and on the understanding that any person who acts upon it or otherwise changes his/her position in reliance thereon does so entirely at his/her own risk. Neither the Society nor Cambridge University Press accepts responsibility for any trade advertisement included in this publication.

This journal is printed on acid-free paper from renewable sources. Printed in the UK by Bell & Bain Ltd., Glasgow.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

British Journal of Nutrition is covered in Current Contents®/Agriculture, Biology & Environmental Sciences, SciSearch®, Research Alert®, Current Contents®/Life Sciences, Index Medicus® (MEDLINE®), AGRICOLA®, CAB Abstracts™, Global Health, BIOSIS® Database, EMBASE/Excerpta Medica and Elsevier BIOBASE/Current Awareness in Biological Sciences, CINAHL, and Chemical Abstracts Service.

JOURNALS

Proceedings of the Nutrition Society

Published on behalf of The Nutrition Society

Editor-in-Chief

K.R. Westerterp, Maastricht University, The Netherlands

Proceedings of the Nutrition Society publishes papers and abstracts presented by members and invited speakers at the scientific meetings of The Nutrition Society. The journal provides an invaluable record of the scientific research currently being undertaken, contributing to 'the scientific study of nutrition and its application to the maintenance of human and animal health.'

British Journal of Nutrition

Directions to Contributors - Concise Version

(Revised August 2007)

The *British Journal of Nutrition* is an international peer-reviewed journal that publishes original papers, review articles, technical notes and short communications in English in all branches of nutritional science. **Prospective authors should note that they (or their institutions) now retain the copyright of their material published in the *British Journal of Nutrition*.** As a contributor you are asked to follow the guidelines set out below. For detailed information on the presentation of the technical content of your paper please see the full version of the **Directions to Contributors**, which can be downloaded from the Nutrition Society website (<http://www.nutrition-society.org>). Prospective authors may also contact the Publications Office directly on + 44 (0)20 7605 6555 (telephone), +44 20 7602 1756 (fax), or edoffice@nutsoc.org.uk (email).

Papers should be accompanied by a statement to the effect that the conditions laid down in the full Directions to Contributors are accepted. The statement should affirm that the submission represents original work that has not been published previously and which is not currently being considered by another journal. It should also confirm that each author has seen and approved the contents of the submitted paper. At the time of acceptance the authors should provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer). The Licence to Publish is available on the Nutrition Society website (<http://www.nutrition-society.org>). All relevant financial interests should be declared.

Text. Papers should be submitted with 1.5 line spacing and margins of at least 2 cm on each side. Text should be printed without underlining, bold or italics (except for scientific names). Standard abbreviations (e.g. Fig. and Figs.) and SI units should be used. **Typescripts can be submitted as Word, WordPerfect, EPS, Text, Postscript or RTF files. A Word processing format is required for production purposes once papers have been accepted. When substantial revisions are required to typescripts, authors are given the opportunity to do this once only, the need for any further changes should at most reflect any minor issues.**

Title Page. The first page should include a concise, informative title together with the names and addresses of the authors. A contact name for correspondence should be given and telephone, fax and email addresses provided. Authors should supply three or four key words or phrases (each containing up to three words). A short title of up to 45 characters is required as a running head.

Abstract. Each paper should commence with an accurate and informative abstract, written as a single paragraph. It should be complete in itself and intelligible without reference to the text or figures, and should not exceed 250 words.

Tables. Tables should be reduced to the simplest form, and should not duplicate information in the text or figures. They should be typed on separate pages, one page for each Table, at the end of the article and carry headings describing their content.

Illustrations. The original illustrations should accompany the submitted typescript. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they clearly contribute to the text. All figures should be numbered and legends should be provided.

Note that authors will be charged 350 GBP for the publication of colour figures. Authors from countries entitled to free journal access through HINARI will be exempt from these charges.

References. References should be based on the numbered (Vancouver) system. **When an article has more than ten authors, only the names of the first three should be given followed by *et al.*; give abbreviated journal titles and conform to the following styles:**

Goel V, Cheema SK, Agellon LB, Ooraikul B & Basu TK (1999) Dietary rhubarb (*Rheum rhabarbarum*) stalk fibre stimulates cholesterol 7 α -hydroxylase gene expression and bile acid excretion in cholesterol-fed C57BL/6J mice. *Br J Nutr* **81**, 65–71.

Jenkins DJ, Kendall CW, Marchie A, *et al.* (2003) The effect of combining plant sterols, soy protein, viscous fibres, and almonds in treating hypercholesterolemia. *Metabolism* **52**, 1478–1483.

Brandtzaeg P (2003) Role of local immunity and breast-feeding in mucosal homeostasis and defence against infections. In *Nutrition and Immune Function*, pp. 273–320 [PC Calder, CJ Field and HS Gill, editors]. Wallingford, Oxon: CAB International.

Stock M & Rothwell NJ (1982) *Obesity and Leanness: Basic Aspects*. London: John Libbey.

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. 'The conceptual difficulty of this approach has recently been highlighted^(1,2-4)'. If a reference is cited more than once the same number should be used each time.

Referees. Authors are asked to submit the names of up to four scientists who would be well-qualified to review the paper; however, no more than one such reviewer will be used. The email addresses and institutions of the named reviewers should be given.

Proofs. PDF page proofs will be emailed to authors for checking, and should be returned within 3 days (by fax or Express mail) to the BJN Production Editor, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU, UK; fax +44 1223 325802, email bjnproduction@cambridge.org

Typescripts. The *British Journal of Nutrition* operates an on-line submission and reviewing system (eJournalPress). Authors should submit to the following address: <http://bjn.msubmit.net/> If any difficulties are encountered please contact the Publications Office (details above) immediately.

Short Communications

Effect of lean red meat from lamb *v.* lean white meat from chicken on the serum lipid profile: a randomised, cross-over study in women.
R. Mateo-Gallego, S. Perez-Calahorra, A. Cenaarro, A. M. Bea, E. Andres, J. Horro, E. Ros & F. Civeira 1403–1407

Plasma choline concentration varies with different dietary levels of vitamins B₆, B₁₂ and folic acid in rats maintained on choline-adequate diets.
N. van Wijk, C. J. Watkins, M. Böhlke, T. J. Maher, R. J. J. Hageman, P. J. G. H. Kamphuis, L. M. Broersen & R. J. Wurtman 1408–1412

Molecular Nutrition

Isomer-specific effects of conjugated linoleic acid on blood pressure, adipocyte size and function.
V. DeClercq, C. G. Taylor & P. Zahradka 1413–1421

A variant in the heart-specific fatty acid transport protein 6 is associated with lower fasting and postprandial TAG, blood pressure and left ventricular hypertrophy.
A. Auinger, U. Helwig, M. Pfeuffer, D. Rubin, M. Luedde, T. Rausche, N. E. El Mokhtari, U. R. Fölsch, S. Schreiber, N. Frey & J. Schrezenmeier 1422–1428

Metabolism and Metabolic Studies

Bifidobacterium adolescentis supplementation ameliorates visceral fat accumulation and insulin sensitivity in an experimental model of the metabolic syndrome.
J. Chen, R. Wang, X.-F. Li & R.-L. Wang 1429–1434

Refeeding with a high-protein diet after a 48 h fast causes acute hepatocellular injury in mice.
M. Oarada, T. Tsuzuki, T. Nikawa, S. Kohno, K. Hirasaka & T. Gono 1435–1444

Postprandial glucose, insulin and glucagon-like peptide 1 responses to sucrose ingested with berries in healthy subjects.
R. Törrönen, E. Sarkkinen, T. Niskanen, N. Tapola, K. Kilpi & L. Niskanen 1445–1451

Degradation of pectin in the caecum contributes to bioavailability of iron in rats.
T. Miyada, A. Nakajima & K. Ebihara 1452–1457

Imbalance of arginine and asymmetric dimethylarginine is associated with markers of circulatory failure, organ failure and mortality in shock patients.
M. Visser, M. A. R. Vermeulen, M. C. Richir, T. Teerlink, A. P. J. Houdijk, P. J. Kostense, W. Wisselink, B. A. J. M. de Mol, P. A. M. van Leeuwen & H. M. Oudemans-van Straaten 1458–1465

Microbiology

A randomised crossover study investigating the effects of galacto-oligosaccharides on the faecal microbiota in men and women over 50 years of age.
G. E. Walton, E. G. H. M. van den Heuvel, M. H. W. Kusters, R. A. Rastall, K. M. Tuohy & G. R. Gibson 1466–1475

Human and Clinical Nutrition

Protein levels in enteral feeds: do these meet requirements in children with severe cerebral palsy?
N. Schoendorfer, U. Tinggi, N. Sharp, R. Boyd, L. Vitetta & P. S. W. Davies 1476–1481

The proportion of lycopene isomers in human plasma is modulated by lycopene isomer profile in the meal but not by lycopene preparation.
M. Richelle, P. Lambelet, A. Rytz, I. Tavazzi, A.-F. Mermoud, C. Juhel, P. Borel & K. Bortlik 1482–1488

Long-term impact of infantile short bowel syndrome on nutritional status and growth.
J. F. Olieman, C. Penning, M. Spoel, H. IJsselstijn, T. L. van den Hoonaard, J. C. Escher, N. M. A. Bax & D. Tibboel 1489–1497

Body size at birth modifies the effect of fat mass and obesity associated (*FTO*) rs9939609 polymorphism on adiposity in adolescents: the Healthy Lifestyle in Europe by Nutrition in Adolescence (HELENA) study.
I. Labayen, J. R. Ruiz, F. B. Ortega, F. Gottrand, I. Huybrechts, J. Dallongeville, K. Widhalm, M. Ferrari, A. Buyken, M. Kersting, G. Moschonis, D. Turck, S. Gómez, M. Sjostrom, A. Meirhaeghe & L. A. Moreno 1498–1504

Cholesterol-lowering efficacy of a microencapsulated bile salt hydrolase-active *Lactobacillus reuteri* NCIMB 30242 yoghurt formulation in hypercholesterolaemic adults.
M. L. Jones, C. J. Martoni, M. Parent & S. Prakash 1505–1513

Differential responses to selenomethionine supplementation by sex and genotype in healthy adults.
G. F. Combs Jr, M. I. Jackson, J. C. Watts, L. K. Johnson, H. Zeng, J. Idso, L. Schomburg, A. Hoeg, C. S. Hoefig, E. C. Chiang, D. J. Waters, C. D. Davis & J. A. Milner 1514–1525

Dietary Surveys and Nutritional Epidemiology

Maternal dietary patterns in pregnancy and fetal growth in Japan: the Osaka Maternal and Child Health Study.
H. Okubo, Y. Miyake, S. Sasaki, K. Tanaka, K. Murakami, Y. Hirota & Osaka Maternal and Child Health Study Group 1526–1533

Urbanisation, nutrition transition and cardiometabolic risk: the Benin study.
H. Delisle, G. Ntandou-Bouzitou, V. Agueh, R. Sodjinou & B. Fayomi 1534–1544

Innovative Technique

Prediction of fat-free mass and percentage of body fat in neonates using bioelectrical impedance analysis and anthropometric measures: validation against the PEA POD.
B. E. Lingwood, A.-M. Storm van Leeuwen, A. E. Carberry, E. C. Fitzgerald, L. K. Callaway, P. B. Colditz & L. C. Ward 1545–1552

Behaviour, Appetite and Obesity

The fake food buffet – a new method in nutrition behaviour research.
T. Bucher, K. van der Horst & M. Siegrist 1553–1560
