STATEMENT OF AIMS

Institutions are the stuff of social and economic life. The importance of understanding the role of institutions in economic growth is now widely appreciated. The *Journal of Institutional Economics* is devoted to the study of the nature, role and evolution of institutions in the economy, including firms, states, markets, money, households and other vital institutions and organizations. It welcomes contributions by all schools of thought that can contribute to our understanding of the features, development and functions of real world economic

institutions and organizations.

The *Journal of Institutional Economics* is an interdisciplinary journal that will be of interest to all academics working in the social sciences, including in economics, business studies, sociology, politics, geography, anthropology and philosophy. The *Journal of Institutional Economics* aims to provide all authors with an expert verdict on their articles within 50 days of submission.
