

JOURNAL OF THE AUSTRALIAN MATHEMATICAL SOCIETY

Submission of research papers in pure mathematics and statistics is invited under the condition that the paper has not been published and is not being considered for publication anywhere else.

The Journal is seeking articles of more general interest and of moderate length, preferring papers with a good introduction explaining the meaning and value of results. In view of the pressure on space, only papers highly rated by assessors can be accepted.

Authors should submit PDF files of papers to the Journal through our website **www.austms.org.au/Publications/Submissions/JAustMS** where they will be able to track the progress of their submission. It is also possible to submit the files by emailing a PDF file to jamsed@austms.org.au.

PREPARATION OF MANUSCRIPTS

1. Papers should be double spaced and have a generous margin. Authors should keep copies of all files.

2. Authors are encouraged to prepare their papers in \LaTeX ; a style file can be downloaded by following links given at the Journal website. Other forms of electronic source may be useful.

3. Each manuscript should include an abstract of no more than 150 words, preferably containing no formulae, a 2000 Mathematics subject classification, and a short title of no more than 40 characters.

4. For the style of references consult recent issues of the journal. The current usage is either the number referencing [1], [2], [3], or the letter referencing, such as [DS1], [DS2], [DS3] if the authors are N. Dunford and J. T. Schwartz, and the reference is to the 3 volumes of their monograph. In either style, references should be ordered alphabetically by the first author's name. Abbreviations of journal names should follow Mathematical Reviews.

5. If not using \LaTeX , specify the symbols to be set in special typefaces (bold, fraktur, script, etc.).

6. Avoid abbreviations such as Thm., Prop., Eq., Ex., iff. In the text do not use the symbols \forall , \exists , \implies and \iff . For more information about our stylistic requirements, see the Journal website accessible through www.austms.org.au.

7. Graphics should be prepared to professional standards, preferably using Postscript or \LaTeX drawing facilities. Charges may apply if the typesetters have to recreate a graphics file because the original is not suitable for printing.

Copying: This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA. Organizations in the USA who are registered with the CCC may therefore copy material beyond the limits permitted by sections 107 and 108 of US copyright law subject to payment to CCC of the per-copy fee of \$16.00. This consent does not extend to multiple copying for promotional and commercial purposes. Code 1446-7887/2009 \$16.00.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions. For all other use, permission should be sought from Cambridge or the American branch of Cambridge University Press.

Table of Contents

Elementary invariants for centralizers of nilpotent matrices <i>Brown, J. & Brundan, J.</i>	1
Regularity of curves with a continuous tangent line <i>Burgués, J. M. & Cufí, J.</i>	17
Algebras associated with a free inverse monoid <i>Crabb, M. J.</i>	27
A cancellation property of the Moore–Penrose inverse of triple products <i>Damm, T. & Wimmer, H. K.</i>	33
The finite sum of the products of two Toeplitz operators <i>Ding, X.</i>	45
A note on the Freiman and Balog–Szemerédi–Gowers theorems in finite fields <i>Green, B. & Tao, T.</i>	61
Minimal graphs with discontinuous boundary values <i>Huff, R. & McCuan, J.</i>	75
Freiman theorem, Fourier transform and additive structure of measures <i>Iosevich, A. & Rudnev, M.</i>	97
Locally primitive graphs of prime-power order <i>Li, C. H., Pan, J. & Ma, L.</i>	111
Automorphism groups of the imprimitive complex reflection groups <i>Shi, J.-Y. & Wang, L.</i>	123
Constructing Herman rings by twisting annulus homeomorphisms <i>Wang, X. & Zhang, G.</i>	139
