

## CONTENTS—Continued

*Page.*

21. J. LONGUET. Studies on nickel hydroxide.
23. J. MERING. Work carried out at the Laboratoire Central des Services Chimiques.
24. S. HENIN. Observations on the formation and evolution of clays.
26. S. CAILLÈRE. Application of differential thermal analysis to the study of soil clays.
27. A. HOYOS. Current research work on the clay minerals at the University of Granada, Spain.
30. E. K. CLARE. The influence of the clay fraction on the engineering properties of soil, with some suggestions for future research.
34. E. FORSLIND. Note on work in progress at the Swedish Cement and Concrete Research Institute.
  
37. Editorial to No. 2.
39. H. H. MACEY. The rheological properties of clay.
41. E. W. J. MARDLES. Viscosity and sedimentation of kaolin and bentonite in organic liquids.
44. D. M. C. MACÉWAN. Clay mineral complexes with organic liquids.
47. R. H. S. ROBERTSON. Clay minerals as catalysts: Introduction.
55. F. E. SALT. The use of activated clays as catalysts in polymerisation processes, with particular reference to polymers of  $\alpha$ -methyl styrene.
59. J. N. HARENAPE. The use of montmorillonite catalysts in the cracking of petroleum fractions.
62. T. H. BLAKELEY. The use of clays for fluid catalytic cracking.
