

INNOVATIVE PERSPECTIVES ON ARCHAEOLOGY

Interdisciplinary Contributions to Archaeology

Series Editor: Michael Jochim
Founding Editor: Roy S. Dickens, Jr.†

POTTERY FUNCTION

A Use-Alteration Perspective
by James M. Skibo

Pottery Function offers a systematic use-alteration study that explores methods for determining pottery function from the traces that remain on vessels or sherds. Adopting a combined ethnoarchaeological and experimental approach, the author reveals the processes that govern • the formation of organic residues in a vessel • surface attrition • the formation of carbon deposits.

SPACE, TIME, AND ARCHAEOLOGICAL LANDSCAPES

edited by Jacqueline Rossignol and
LuAnn Wandsnider

This book introduces a unique methodological approach to archaeological inquiry that emphasizes the distribution of archaeological artifacts and features relative to elements of the landscape in order to provide a better understanding of regional archaeological variation.

0-306-44161-6/292 pp. + index/ill./1992/\$47.50
text adoption price on orders of six or more copies: \$32.50

RESOURCES, POWER, AND INTERREGIONAL INTERACTION

edited by Edward M. Schortman and
Patricia A. Urban

Contributions to this volume present a variety of perspectives on the political, economic, and ideological significance of the connections between ancient societies and the importance of inter-regional contacts in governing sociopolitical shifts.

THE FIRST IMMIGRANTS FROM ASIA

A Population History of the
North American Indians

by A. J. Jaffe

with the assistance of Carolyn Sperber†

In this extraordinary survey, A. J. Jaffe traces the evolution of the Amerindians—from their migration from Asia 10 to 15 thousand years ago to the present day—and discusses anthropological, demographic, and sociological changes in Amerindians throughout the course of time.

0-306-43952-2/319 pp. + index/ill./1992/\$39.50

PHYTOLITH SYSTEMATICS

Emerging Issues

edited by George Rapp, Jr. and
Susan C. Mulholland

An invaluable reference, *Phytolith Systematics* presents the current state of knowledge regarding phytolith studies of plant taxa that are important to archaeology and paleoenvironmental reconstruction. Published in cooperation with the Society for Archaeological Sciences. The premier volume in the series *Advances in Archaeological and Museum Science*.

0-306-44208-6/374 pp./ill./1992/\$49.50
text adoption price on orders of six or more copies: \$32.50

APPROACHES TO ARCHAEOLOGICAL CERAMICS

by Carla M. Sinopoli

Principles, Perspectives . . .

Principles of Geoarchaeology

A North American Perspective

Michael R. Waters

Deals with those aspects of geoarchaeology—stratigraphy, site formation processes, and landscape reconstruction—most fundamental to archaeology, and focuses on the late Quaternary of North America, permitting in-depth discussions of the concepts directly applicable to that research.

Assuming no prior geologic knowledge on the part of the reader, Waters provides a background in fundamental geological processes and the basic tools of geoarchaeology. He then proceeds to relate specific physical processes, microenvironments, deposits, and landforms associated with riverine, desert, lake, glacial, cave, coastal, and other environments to archaeological site formation, location, and context. \$40.00

Technological Perspectives on Behavioral Change

Michael Brian Schiffer

Technology responds to and affects virtually all human behavior; yet the interdependence of behavior and artifacts has never been studied intensively. In essays presenting a number of interrelated theoretical positions intended to guide the study of behavioral change, Michael Schiffer now proposes where and how laws of change should be sought. Drawing on case studies that deal with changes in architecture, ceramics and electronic technology, he emphasizes the central idea that the explanations of change must focus on the nexus of behavior and artifacts in the context of activities. \$29.95

The Marana Community in the Hohokam World

Suzanne K. Fish, Paul R. Fish & John H. Madsen, eds.—*The Anthropological Papers, No. 56*

This account of Classic Period settlement in the Tucson Basin between A.D. 1100 and 1300 is the first comprehensive description of the organization of territory, subsistence, and society in a Hohokam community of an outlying region. Data indicate an economic system that interlinked desert farmers through differentiated production and exchange. Extensive fields for the cultivation of agave on marginal land offer dramatic evidence of agricultural specialization. Full documentation of the importance of agave as a food and fiber crop among the Hohokam is a major contribution of Marana research to the ethnobotany of the Southwest. \$12.95

Mechanics of Pre-Industrial Technology

An Introduction to the Mechanics of Ancient and Traditional Material Culture
Brian Cotterell and Johan Kamminga

Combining the skills of an engineer and an archaeologist, the authors show how knowledge of mechanics can aid in creating a better understanding of the functions of artifacts and the achievements of early technology. They examine technology from the earliest stone tools of more than two million years ago to the erection of the statues on Easter Island, which continued into the seventeenth century.

42871-8 Paper \$18.95

Egyptian Art

Elizabeth L. Meyers

The world of the ancient Egyptians is a fascinating one, but its artistic trends are perhaps little known or appreciated by nonspecialists, especially in comparison to more recent Western art. In this fully illustrated introduction to the subject, Elizabeth Meyers conveys the essence of Egyptian art by clearly describing exquisite statues, paintings and artifacts handed down from this period.

Cambridge Introduction to Art
37869-9 Paper \$12.95

The Romanization of Britain

An Essay in Archaeological Interpretation
Martin Millett

The Romanization of Britain is a study of cultural change and interaction. While there are many narrative histories of Roman Britain, this synthesis of recent archaeological work presents the evidence in a new and provocative way.

42864-5 Paper \$19.95

The Eagle and the Spade

Archaeology in Rome During the Napoleonic Era, 1809–1814

Ronald T. Ridley

This book tells the story of the first major archaeological excavations and restorations in Rome, during the Napoleonic occupation of 1809–1814, which cleared all the classical monuments, notably the Forum, Colosseum, and Forum of Trajan. The study is based on unpublished documents in the archives of Rome and Paris, and is set in its broad political and cultural context of contemporary Napoleonic Europe.

40191-7 Hardcover \$79.50

Fifth-century Gaul: A Crisis of Identity

John Drinkwater and Hugh Elton, Editors

This book deals with a highly important aspect of the “decline and fall” of the Roman Empire and the emergence of medieval Europe, namely the loss of Gaul (roughly, modern France) to incoming barbarian kings during the fifth century A.D.

Prehistory of the Americas

Second Edition

Stuart J. Fiedel

“... Concise, clear... what he does so well is offer an explicit account of key issues...”

—*Scientific American*

41532-2 Hardcover \$59.95 / 42544-1 Paper \$19.95

Archaeology, Annales, and Ethnohistory

A. Bernard Knapp, Editor

This collection considers the relevance of the *Annales* “School” for archaeology. *Annales*-oriented research utilizes the techniques and tools of various ancillary fields, and integrates temporal, spatial, material, and behavioral analyses. Such an approach is obviously attractive to archaeologists.

Contributors: *A. Bernard Knapp, Michael Smith, Roland Fletcher, Richard Bulliet, Philip Duke, John F. Moreland, Andrew Sherratt.*

New Directions in Archaeology

41174-2 Hardcover \$49.95

Space, Time and Man

A Prehistorian's View

Grahame Clark

The distinguished prehistoric archaeologist, Grahame Clark, describes in this book how man has extended his understanding of time and space far beyond that of his primate forebears through technology, social organization, and above all, his capacity for abstract thought.

Reading the Isotopic Clocks.

Your research in age determination and stable isotopes requires reliable data and custom service. Teledyne Isotopes has the expertise and experience to meet these requirements.

We have been pioneers in the industry since 1955 and are the only commercial laboratory that offers all major age determination techniques.

We can assure you of reliable data because of well-staffed and well-equipped labs, intercalibration with major universities and government facilities, and through use of N.B.S. and international standards.

For the most reliable reading of the isotopic clocks, come to the experts.

CHANGES IN EDITORSHIPS

American Antiquity Editorial Office

Beginning January 1, 1993, all manuscripts and queries about manuscripts in progress should be addressed to:

Dr. Michael W. Graves
Department of Anthropology
2424 Maile Way
University of Hawaii
Honolulu, HI 96822

Dr. Graves holds the title of editor-designate until the 1993 Annual Business Meeting, at which time he will assume the title of editor. The first issue of *American Antiquity* under his editorship will be July 1993.

Latin American Antiquity Editorial Office

Beginning March 1, 1993, all manuscripts and queries about manuscripts in progress should be addressed to:

Dr. David M. Pendergast
Department of New World Archaeology
Royal Ontario Museum
100 Queen's Park
Toronto, Ontario M5S 2C6
Canada

Dr. Pendergast holds the title of editor-designate until the 1993 Annual Business Meeting, at which time he will assume the title of editor. The first issue of *Latin American Antiquity* under his editorship will be September 1993.

Production Office for Both Journals

After the changes in editorship, production of both journals will continue to be handled by the office of the managing editor. Queries regarding electronic production, copyediting, style, and related matters should be addressed to:

Dr. Teresita Majewski
Department of Anthropology
Bldg. 30
University of Arizona
Tucson, AZ 85721
(602) 621-6297
