In the Pipeline for March 2024

$xy = \cos(x + y)$ and other implicit equations that are surprisingly easy to plot	<i>Michael Jewess</i>
Singular matrices and pairwise-tangent circles	<i>A. F. Beardon</i>
Infinitely many composites	<i>Nick Lord, Des MacHale</i>
Relating constructions and properties through duality	<i>David L. Farnsworth, Steven J. Kilner</i>
Some generalisations and extensions of a remarkable geometry puzzle	<i>Quang Hung Tran</i>
A characterisation of regular n -gons via (in)commensurability	<i>Silvano Rossetto Giovanni Vincenzi</i>
Extensions of Vitas' Theorem	<i>Nikolaos Dergiades, Quang Hung Tran</i>
The role of convexity in defining regular polyhedra	<i>Chris Ottewill</i>
Euler's prime-producing polynomial revisited	<i>Robert Heffernan, Nick Lord, Des MacHale</i>
ABC-Triangles	<i>Jonny Griffiths</i>
Patterns among square roots of the 2×2 identity matrix	<i>Howard Sporn</i>
The Eureka Theorem of Gauss	<i>Stan Dolan</i>
A slowly evolving conical pendulum	<i>Subhranil De</i>
Walk on a Grid	<i>Manija Shahali, H. A. Shahali</i>
