Theories of Explanation

JOSEPH C. PITT, *Virginia Polytechnic Institute*

Since the publication of Carl Hempel and Paul Oppenheim's ground-breaking work "Studies in the Logic of Explanation," the theory of explanation has remained a major topic in the philosophy of science. This valuable collection provides readers with the opportunity to study some of the classic essays on the theory of explanation along with the best examples of the most recent work being done on the topic. In addition to the original Hempel and Oppenheim paper, the volume includes Scriven's critical reaction to it, Wilfrid Sellars's discussion of the problem of theoretical explanation, and pieces by Salmon, Railton, van Fraassen, Friedman, Kitcher, and Achinstein in which they demonstrate the vitality of the subject by extending the scope of the inquiry.

Contemporary Moral Controversies in Technology

Edited by A. PABLO IANNONE, *Central Connecticut State University*

As space satellites orbit the earth on a regular basis and scientists find more sophisticated ways to splice genes, we are all faced with the responsibility of reconciling the lengths to which technology must comply with morality. This book presents a variety of moral controversies of concern in this day and age of technological advancement. The contributors study a wide range of relevant topics such as: current technological development and the ethical inquiries it prompts; risk-cost benefit analysis and other assessment methods; freedom of information and national security, and university-corporate research agreements; national and international technology transfers; and technology policy-making typologies. The current controversies examined draw from information, gene-splicing, health care, space, energy, and material technologies.

CHICAGO

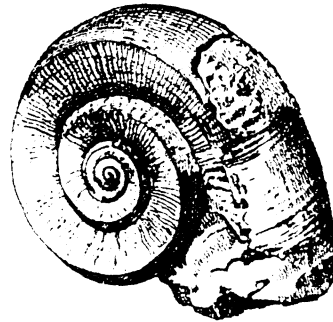

Kepler's Geometrical Cosmology

J. V. FIELD

Field examines Johannes Kepler's search for the geometrical plan according to which God created the universe. Field's sound scholarship provides a more complete picture of this enigmatic man and his work.

Cloth \$37.50 256 pages
88 figures, 21 tables

Darwin and the Emergence of Evolutionary Theories of Mind and Behavior

ROBERT J. RICHARDS

Richards reconstructs the ways in which philosophical conceptions of mind, reason, and moral behavior took on biological and psychological form within the work of such theorists as Jean-Baptiste de Lamarck, Charles Darwin, Herbert Spencer, Alfred Wallace, George Romanes, William James, James Mark Baldwin, Ernst Haeckel, Konrad Lorenz, and Edward Wilson.

Cloth \$29.95 712 pages
37 halftones

Medieval Cosmology

Theories of Infinity, Place, Time, Void, and the Plurality of Worlds

PIERRE DUHEM

Edited and translated by Roger Ariew

"Those who think that nothing happened in cosmology between Ptolemy and Copernicus badly need a course of reading in Duhem. Roger Ariew provides the opportunity in his admirable *Medieval Cosmology*."—Edward Harrison, *Sky and Telescope*

Paper \$19.95 634 pages

The Dark Abyss of Time

The History of the Earth and the History of Nations from Hooke to Vico

PAOLO ROSSI

Translated by Lydia G. Cochrane

"A rich historical pastiche of 17th- and 18th-century philosophy, science, and religion."—G. Y. Craig, *New Scientist*

Paper \$14.95 354 pages

The Measure of Times Past

Pre-Newtonian Chronologies and the Rhetoric of Relative Time

DONALD J. WILCOX

"*The Measure of Times Past* is an extremely sophisticated study in the philosophy of history, from a new and unusually illuminating perspective, that of underlying conceptions of time."—William J. Bouwsma, University of California, Berkeley

Cloth \$27.50 304 pages

**The Origins of
Theoretical Population Genetics**
WILLIAM B. PROVINE

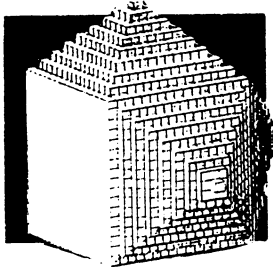

"Provine's book traces the development of population genetics from Darwin and Galton, through Pearson and Bateson, to the synthesis of Fisher, Haldane, and Wright. . . . An informative and very readable account."
—Francisco J. Ayala, *American Scientist*

Paper \$11.95 214 pages

How Experiments End
PETER GALISON

Galison plunges the reader into the social and intellectual world of today's large-scale experimental physics. Looking at the physics experiment as a communal enterprise and showing how physicists build experimental arguments, Galison offers new insight into scientific practice.

Paper \$14.95 336 pages
31 halftones, 49 figures, 3 tables
Library cloth edition \$39.95
Science and Its Conceptual Foundations series

From Mineralogy to Geology

The Foundations of a Science, 1650–1830

RACHEL LAUDAN

Laudan offers a challenging alternative view of the history of geology, stressing the neglected Continental traditions of mineralogy and chemical cosmogony.

Cloth \$27.50 288 pages
19 illustrations
Science and Its Conceptual Foundations series

Truth and Beauty

Aesthetics and Motivations in Science

S. CHANDRASEKHAR

Truth and Beauty collects seven lectures of the distinguished astrophysicist S. Chandrasekhar, addressing aesthetics, creativity, and motivations in the pursuit of science.

Cloth \$23.95 184 pages
6 halftones, 8 line drawings, 4 tables

Patterns, Thinking, and Cognition

A Theory of Judgment

HOWARD MARGOLIS

Margolis builds a fascinating case for a theory that thinking is based on recognizing patterns and that this process is intrinsically a-logical, challenging the prevailing understanding of how the mind works with careful argument and originality. His reanalysis of the trial of Galileo focuses on social cognition and its interactions with politics.

Paper \$13.95 (est.) 320 pages (est.)
29 line drawings
Library cloth edition \$36.00 (est.)

Philosophical Foundations of Quantum Field Theory

Edited by HARVEY R. BROWN and ROM HARRÉ, *both of the University of Oxford*

The first systematic exploration of the nature and implications of quantum field theory, this multidisciplinary collection of essays details its mathematical structure and metaphysical and methodological concerns.
May 1988 208 pp. \$42.50

The Metaphysics of Quantum Theory

HENRY KRIPS, *University of Melbourne*

This book outlines the contours of the debate between Bohr's "orthodox" and Einstein's "realist" explanation of quantum theory, presenting a revised interpretation that resolves most of the paradoxes associated with quantum theory.
January 1988 272 pp. \$49.95

The Sanctity-of-Life Doctrine in Medicine

A Critique

HELGA KUHSE, *Monash University*

Examining and refuting the "sanctity-of-life" view in medical decision making, Kuhse argues for a quality-of-life ethic based on the belief that there is a profound difference between merely being alive and life being in the patient's best interest.
1987 256 pp. \$45.00

The Description of Nature

Niels Bohr and the Philosophy of Quantum Physics

JOHN HONNER, *Jesuit Theological College, Victoria*

This study explores several dimensions of physicist Niels Bohr's original philosophy of quantum theory—complementarity and correspondence, objectivity and realism, and the infinite harmony of nature.
February 1988 256 pp. \$54.00

The Liar

An Essay on Truth and Circularity

JON BARWISE and JOHN ETCHEMENDY, *both of Stanford University*

"Some interesting work of the Stanford based logicians Jon Barwise and John Etchemendy has thrown considerable light on to [the] vexing problem of [paradoxes]." —*The Guardian*. Bringing together powerful new tools from set theory and the philosophy of language, this book proposes a solution to the Paradox of the Liar. Barwise and Etchemendy model and compare the Russellian and Austinian conceptions of propositions, and develop a range of model-theoretic techniques—based on the work of Aczel—that open up new avenues in logical and formal semantics.
1987 208 pp. \$19.95

Aristotle

The Desire to Understand

Jonathan Lear

A philosophical introduction to Aristotle. Professor Lear starts where Aristotle himself started, introduces us to the essence of Aristotle's philosophy and guides us through all the central Aristotelian texts – selected from the *Physics*, *Metaphysics*, *Ethics*, *Politics* and biological and logical works.

Cloth about \$39.50 Paper about \$12.95

Gassendi the Atomist

Advocate of History in an Age of Science

Lynn S. Joy

This study of the life and work of the French physicist and philosopher, Pierre Gassendi, describes his revival during the seventeenth century of the ancient Greek philosophy of Epicurean atomism. Gassendi was widely regarded in France as Descartes' chief rival in philosophy, and he was an early defender of scientific ideas of Kepler and Galileo.

Ideas in Context

About \$39.50

Ideas for a Philosophy of Nature

F.W.J. Schelling

Translators: Errol E. Harris, Peter Heath

Introduction by Robert Stern

This is the first English translation of Schelling's *Ideas for a Philosophy of Nature*, one of the most significant works in the German tradition of philosophy of nature and early nineteenth century philosophy of science.

Texts in German Philosophy

Cloth about \$49.50 Paper about \$15.95

Particles and Paradoxes

The Limits of Quantum Logic

Peter Gibbins

This book gives a critical review of work on the foundations of quantum mechanics at a level accessible to non-experts. Gibbins focuses on whether the results of quantum theory require us to abandon classical logic and whether quantum logic can resolve the paradoxes produced by quantum mechanics.

Cloth \$34.50 Paper \$11.95

General Equilibrium Analysis

Studies in Appraisal

E. Roy Weintraub

What is the nature of the intellectual enterprise – general equilibrium analysis – that so many economists regard as the enterprise of their discipline? In this book, Roy Weintraub considers both the modern history of the analysis, and the methodological puzzles that it and mathematical economic theory in general pose.

Galileo: Heretic

Pietro Redondi

Translated by *Raymond Rosenthal*

Here is the much-awaited English translation of a book that has been the subject of widespread debate since its publication in Italy and its translation into French: a work that makes startling new claims about the trial of Galileo in an evocative style that some have compared to that of Umberto Eco's *The Name of the Rose*.

Pietro Redondi boldly reinterprets Galileo's famous trial for heresy in 1633, arguing that the Jesuits plotted Galileo's downfall for reasons other than his beliefs about astronomy.

"Redondi writes highly documented history, but he loves to tell stories; and, as much as the narrative of historical facts, the story of this own research acquires the suspense of a detective story."

—*Italo Calvino, The New York Review of Books*

Cloth: \$29.95 ISBN 0-691-08451-3

Fact and Method

Explanation, Confirmation and Reality in the
Natural and the Social Sciences

Richard W. Miller

In this bold work Richard Miller sets out to reorient the philosophy of science. By questioning both positivism and its leading critics, he develops new solutions to the most urgent problems about justification, explanation, and truth.

Using a wealth of examples from both the natural and the social sciences, *Fact and Method* applies the new account of scientific reason to specific questions of method in virtually every field of inquiry.

"I don't see how anyone who is seriously interested in problems of explanation in the natural sciences can work without taking Miller's views into serious account."

PHILOSOPHY OF SCIENCE

Typescript. Typescript, double-spaced, should be submitted (in triplicate) to Professor Robert E. Butts, Department of Philosophy, Talbot College, University of Western Ontario, London, Ontario, Canada N6A 3K7. Typescripts will not be returned unless return postage is prepaid by cheque, money order, International Reply Coupons or Canadian stamps. A bibliographical list of cited references beginning with the author's last name, initials, followed by the year of publication in parentheses, should be headed 'References' and placed on a separate sheet in alphabetical order. Simple citations should then be made by employing in the text, rather than by footnote, the reference list by citing author and year of publication, for example, Jones (1958) or (Smith 1974, p. 46). A detailed guide to the new reference style appears in the March issue of each year. Discursive footnotes should be numbered consecutively throughout the typescript. *Typescript should not exceed thirty-five double-spaced pages. Longer essays will be returned to the author(s) to be cut to the acceptable maximum. A summary abstract of approximately 100 words should accompany each article.* All illustrations must be professionally drawn and lettered. All formulas and equations should be put in such a form as to help minimize the number of printed lines in the journal. In the following examples the form on the right is preferable to that on the left:

$$(1) \quad p = -\frac{dx}{dy} = -\frac{dz}{dt} \qquad p = -dx/dy = -dz/dt$$

$$(2) \quad \frac{1}{x} \prod_{n=1}^{\infty} \frac{\left(1 + \frac{1}{a_n}\right)}{\left(1 - \frac{1}{b_n}\right)} \qquad (1/x) \prod_{n=1}^{\infty} [(1 + 1/a_n)/(1 - 1/b_n)]$$

Page charges. There is a two dollar per page publication charge for individuals who are not members of the Philosophy of Science Association.

Copyright. Manuscripts should be submitted to *Philosophy of Science* with the understanding that upon publication copyright will be transferred to the Philosophy of Science Association.

Reprints. Contributors of articles to this journal will receive, gratis, 25 reprints. Authors desiring additional reprints may order them by sending in, with their corrected galleys, the special order forms that they will find enclosed with their galleys.

Reviews. Publications intended for review should be sent to Prof. William Demopoulos, at the address given above.

Philosophy of Science is published quarterly; issues are dated *March, June, September* and *December* of each year. Correspondence concerning business matters should be addressed to Peter D. Asquith, Executive Secretary, Department of Philosophy, Michigan State University, East Lansing, Michigan 48824, U.S.A.

Membership and Subscriptions. Membership in the Philosophy of Science Association may be applied for by writing to the Executive Secretary of the Association. Membership dues are \$35.00 U.S.A. a year and include subscription to the journal. Subscription price for nonmembers is \$45.00 U.S.A. (\$46.00 non-U.S.A.) per volume. New subscriptions and renewals are entered to begin with the first issue of the current volume. Should any issue of the current volume be out of print at the time the subscription order is received, the pro-rata value will be refunded to the subscriber. Duplicate copies may be obtained (if available) from the Executive Secretary at the regular price of single issues (\$12.00). Subscriptions at a reduced rate of \$18.00 a year are available to qualified students; inquire of the Executive Secretary.
