Editor

Anastasios Xepapadeas, University of Crete, Greece

Environment and Development Economics is firmly positioned at the intersection of economics, environment and development, publishing original papers addressed to the research and policy communities, and is designed to be accessible to a broad readership. The Editor and Associate Editors are supported by distinguished panels of advisors from around the world, who together ensure that the journal is a major forum for key research conducted in low-income countries as well as elsewhere, and for the work of younger scholars. The journal is divided into two main sections, Theory and Applications and Policy Options.

Parasitology publishes original papers on all aspects of parasitology and host-parasite relationships, ranging from the latest discoveries in biochemical and molecular biology to ecology and epidemiology in the context of the medical, veterinary and biological sciences.

Two specially commissioned issues with important topics in parasitology, including the proceedings of the symposia of the British Society for Parasitology, are included in the annual subscription.

Editor

J.W. Doran, University of Nebraska, USA

Renewable Agriculture and Food Systems (Formerly *American Journal of Alternative Agriculture*) is a multi-disciplinary journal which focuses on the science that underpins economically, environmentally, and socially sustainable approaches to agriculture and food production. Coverage includes the economic, ecological, and environmental impacts of agriculture; the effective use of renewable resources and biodiversity in agro-ecosystems; and the technological and sociological implications of sustainable food systems.

Editor

Marc Alan Cohn, Louisiana State University, USA

Seed Science Research, the official journal of the International Society for Seed Science, is a leading international journal featuring high-quality original papers and review articles on the fundamental aspects of seed science, reviewed by internationally distinguished editors. The emphasis is on the physiology, biochemistry, molecular biology and ecology of seeds.

Experimental Agriculture

INSTRUCTIONS TO CONTRIBUTORS

Electronic Submission of Manuscripts

Contributions for consideration for publication, accompanied by a covering email, should be submitted to the following address:

Dr. D. Harris
Experimental Agriculture
CAZS Natural Resources, Bangor University,
Wales, UK.
Email: expag@bangor.ac.uk

Please consult the Instructions for Contributors available at <http://uk.cambridge.org/journals/eag/eagifc.htm>. Potential contributors are asked to give careful attention to these instructions. This will greatly assist the editors and thus speed the processing of their contributions.

Editorial Policy

With a focus on the tropical and sub-tropical regions of the world, *Experimental Agriculture* publishes the results of original research on field, plantation and herbage crops grown for food or feed, or for industrial purposes, and on farming systems, including livestock and people. It reports experimental work designed to explain how crops respond to the environment in biological and physical terms, and on the social and economic issues that may influence the uptake of the results of research by policy makers and farmers, including the role of institutions and partnerships in delivering impact. The journal also publishes accounts and critical discussions of new quantitative and qualitative methods in agricultural research, and of contemporary issues arising in countries where agricultural production needs to develop rapidly. There is a regular book

review section and occasional, often invited, reviews of research. Most papers are published within six months from acceptance.

The minimum standards for a paper to be considered by the Editor and the referees are set out below:

- The title page, all headings and the references must conform to the style of *Experimental Agriculture*.
- Each table and figure must be cited in the text of the typescript.
- All figures to be supplied as separate TIFF or EPS files wherever possible.
- The statistical treatment of experimental data must conform to the instructions given in Riley, J. (2001). Presentation of statistical analyses. *Experimental Agriculture* 37: 115–123.
