1	What is a Pomeron?	1
1.1	Life before QCD	1
1.2	Sommerfeld–Watson transform	9
1.3	Signature	9
1.4	Regge poles	11
1.5	Factorization	12
1.6	Regge trajectories	13
1.7	The Pomeron	15
1.8	Total cross-sections	17
1.9	Differential elastic cross-sections	19
1.10	Diffraction dissociation	21
1.11	Deep inelastic scattering	23
2	A simple example	25
2.1	The model	26
2.2	The leading order contribution	27
2.3	Next-to-leading order contribution	31
2.4	The n -rung ladder diagram	38
2.5	The integral equation	42
2.6	The Pomeron	43
2.7	Summary	44
2.8	Appendix	45
3	The reggeized gluon	48
3.1	Leading order calculation	50
	3.1.1 <i>The eikonal approximation</i>	51
3.2	Order α_s corrections	53
3.3	Order α_s^2 corrections	55
3.4	The $2 - (n + 2)$ amplitude at the tree level	64

3.5	Absence of fermion loops	72
3.6	Ladders within ladders	73
3.7	The integral equation	75
3.8	Summary	80
4	The QCD Pomeron	82
4.1	First three orders of perturbation theory	83
4.2	The BFKL equation	87
4.3	The solution for zero momentum transfer	90
4.4	Impact factors	94
4.5	Solution for non-zero momentum transfer	99
4.6	Deviations from ‘soft’ Pomeron behaviour	103
4.7	Higher order corrections	104
4.8	Summary	109
4.9	Appendix	110
5	From cuts to poles	113
5.1	Diffusion	114
5.2	Accounting for the running of the coupling	117
5.3	Large momentum transfer	123
5.4	The Landshoff–Nachtmann model	126
5.5	The effect of non-perturbative propagators	128
5.6	The heterotic Pomeron	135
5.7	Summary	137
6	Applications in deep inelastic scattering	139
6.1	Introduction	140
6.2	The low- x structure functions	142
6.3	Associated jet production	149
6.4	The Altarelli–Parisi approach	155
6.5	Exclusive distributions and coherence	162
6.6	Summary	169
6.7	Appendix A	169
6.8	Appendix B	173
7	Diffraction	175
7.1	Elastic scattering at $t = 0$	175
7.2	Diffusion in large t elastic scattering	176
7.3	Diffraction dissociation and Pomeron substructure	185
	7.3.1 <i>The proton rest frame picture</i>	185
	7.3.2 <i>Introduction to photon dissociation</i>	193

7.3.3	<i>The Pomeron structure function</i>	198
7.4	Summary	202
8	Taming the growth	204
8.1	Dipole scattering	205
8.2	Unitarity	213
	8.2.1 <i>The operator formalism</i>	215
	8.2.2 <i>Multiple scattering</i>	223
8.3	Summary	231
8.4	Appendix A	232
8.5	Appendix B	233
	Appendix: Feynman rules for QCD	238
	References	240
	Index	246
