CRADOCK'S STEEL WIRE STRANDS & CABLES FOR RIGGING AIRCRAFT.

(AS THE QUESTION OF SOUND RIGGING IS ONE OF SUCH VITAL IMPORTANCE, THE BEST ONLY SHOULD BE USED.)

Since the Advent of Flying, this Company,—

WHO HAVE MANUFACTURED STEEL WIRE ROPES FOR OVER 60 YEARS,
have made a special study of this class of work, and have for some years now supplied

SPECIAL FLEXIBLE STRANDS AND CABLES FOR AVIATION

constructed of 7, 19, 37, 49, 133, and 259 Galvanized or Plated Steel Wires of the greatest tensile strain possible compatible with the requisite ductility and toughness, and ranging from

BREAKING STRAINS of from 375 to 16230 Lbs

THERE IS NOTHING BETTER OBTAINABLE.

The Pioneers

Of the Plywood industry were Venesta Ltd.; they held the premier position then because there were no competitors. Now, in the face of increasing competition from almost every country in the world, they hold it still—indisputably.

VENESTA PLYWOOD

It is in constant demand by the British and Allied Governments, the largest Shipbuilding and Railway Companies, Aeroplane & Motor Car Builders, etc. It is waterproof, unshrinkable, and practically indestructible, and these qualities, together with its smooth, clean surface, make it the finest material in the world for panelling of every description.

Aeroplane Models

THE Silver Model of an Aeroplane illustrated shows how technical knowledge and skilled workmanship are allied in the models produced by the Goldsmiths and Silversmiths Company.

Infinite care is taken to ensure every detail being accurate and of proper proportions, and to reproduce an exact replica of the original.

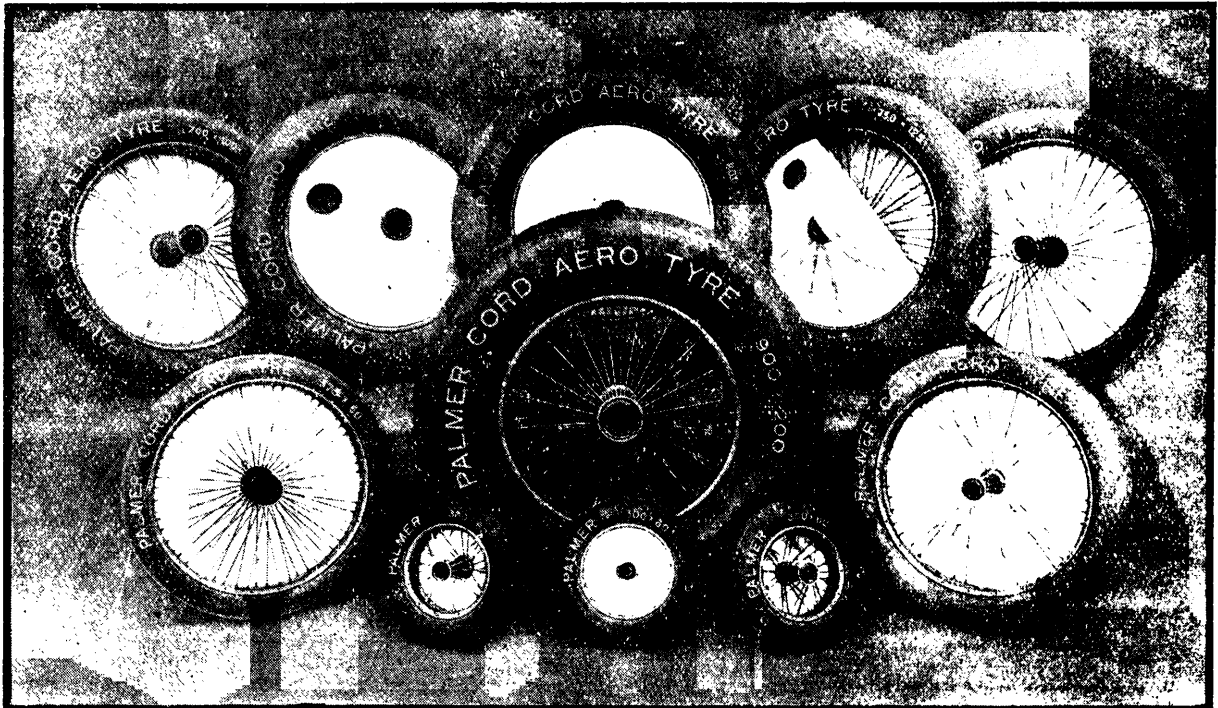

Models can be prepared from the original or from a photograph. Estimates and designs will be submitted free upon application.

The Goldsmiths and Silversmiths Company have no other establishments in Regent Street, Oxford Street, or anywhere else in London, and no branches in the Provinces or Abroad.

The efficiency of your machine depends upon your clutches and brakes.

Twenty years or so ago we invented Ferodo Fabrics. Since then, we have, by employing skilled engineers and the finest testing plant in the world, greatly improved Ferodo Fabrics, so that to-day they are readily acknowledged to be the finest friction surfaces in the world.

They are entirely unaffected by water, oil or acid, and absorb more foot lbs. of energy per square inch than any other material known. Wood and leather linings char and quickly wear out. Ferodo Fabrics are spark proof and non-inflammable.

Ferodo Fabrics have the name stamped on each foot. Look for it when ordering your new linings.
