Plant Genetic Resources: Characterization and Utilization

Volume 7 2009 ISSN: 1479-2621

Aims and Scope

The journal provides a forum for describing the application of novel genomic technologies, as well as their integration with established techniques, towards the understanding of the genetic variation captured in both *in situ* and *ex situ* collections of crop and non-crop plants; and for the airing of wider issues relevant to plant germplasm conservation and utilisation. We particularly welcome multi-disciplinary approaches that incorporate both a technical and a socio-economic focus.

Technical aspects can cover developments in technologies of potential or demonstrated relevance to the analysis of variation and diversity at the phenotypic and genotypic levels; the development of rational germplasm collection, evaluation and conservation strategies; and the impact of crop genetic modification and biotechnology on plant genetic resources. Authors should note that the journal will not review submissions using the RAPD marker system, except where very large numbers of assays place a cost limitation on the analysis, or where RAPD data is combined with, and is co-analysed with other forms of descriptive data, which allows an objective means of assessing the credibility of the RAPDs.

Non-technical aspects can include ethical, legal, commercial and social issues of relevance, in particular relating to farmers' rights, intellectual property and ethnobotany.

Plant Genetic Resources Characterization and Utilization

Contents

Response of early maturing maize landraces and improved varieties to moisture deficit and sufficient water supply <i>Abebe Menkir, Baffour Badu-Apraku, Sam Ajala, Alpha Kamara and Abdou Ndiaye</i>	205
Genetic diversity among <i>Lagenaria siceraria</i> accessions containing resistance to root-knot nematodes, whiteflies, ZYMV or powdery mildew <i>Amnon Levi, Judy Thies, Kai-shu Ling, Alvin M. Simmons, Chandrasekar Kousik and Richard Hassell</i>	216
Short Communication	
Evaluation of USDA <i>Lupinus</i> sp. collection for seed-borne potyviruses <i>N. L. Robertson and C. J. Coyne</i>	227
Genetic diversity and phaseolin variation in Portuguese common bean landraces <i>G. Igrejas, V. Carnide, P. Pereira, F. Mesquita and H. Guedes-Pinto</i>	230
Evaluation of the grain methionine, lysine and tryptophan contents of maize (<i>Zea mays</i> L.) germplasm in the Germplasm Enhancement of Maize Project <i>M. Paul Scott and Michael Blanco</i>	237
Genetic analysis of mango landraces from Mexico based on molecular markers <i>Didiana Gálvez-López, Sanjuana Hernández-Delgado, Maurilio González-Paz, Enrique Noe Becerra-Leor, Miguel Salvador-Figueroa and Netzabualcoyotl Mayek-Pérez</i>	244
Hexacosanoic acid and other very long-chain fatty acids in peanut seed oil <i>Lisa L. Dean and Timothy H. Sanders</i>	252
Characterization of medicinal <i>Senna</i> genetic resources <i>J. B. Morris</i>	257
Classification and diversity of sacred and American <i>Nelumbo</i> species: the genetic relationships of flowering lotus cultivars in Japan using SSR markers <i>Nakao Kubo, Masasbi Hirai, Akio Kaneko, Daizo Tanaka and Kumaji Kasumi</i>	260
Development and characterization of <i>Triticum aestivum</i> – <i>Aegilops kotschy</i> amphiploids with high grain iron and zinc contents <i>Nidbi Rawat, Vijay K. Tiwari, Kumari Neelam, Gursharn S. Randhawa, Parveen Chhuneja, Kuldeep Singh and Harcharan S. Dbaliwal</i>	271
Genetic relatedness and cultivar identification in a valuable garden species, <i>Hesperantha coccinea</i> (<i>Schizostylis coccinea</i>) <i>Kirsten Wolff, Sabina Knees and Suzanne Cubey</i>	281
Phenotypic and molecular diversity among landraces of snapmelon (<i>Cucumis melo</i> var. <i>momordica</i>) adapted to the hot and humid tropics of eastern India <i>N. P. S. Dhillon, Jugpreet Singh, Mohamed Fergany, Antonio J. Monforte and A. K. Sureja</i>	291

Plant Genetic Resources: Characterization and Utilization is an international journal published tri-annually by Cambridge University Press in April, August and December on behalf of NIAB. The online edition is available at journals.cambridge.org/pgr.

Special sales and supplements:

This Journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The Journal also publishes proceedings on behalf of academic and corporate sponsors. Please contact Katy Christomanou at the Cambridge address above.

Subscription information:

The subscription rates for Volume 7, 2009 (3 issues) are:

Institutional subscription

Internet/Print Package £288.00/\$554.00 (Americas only)

Internet only £231.00/\$445.00 (Americas only)

Print only £267.00/\$514.00 (Americas only)

Any **supplements** to this Journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Back volumes are available. Please contact CUP Publishing for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of

publication. Replacement copies supplied after this date will be chargeable.

US POSTMASTERS: please send address corrections Plant Genetic Resources USA address.

Information for Authors:

Please email manuscript (with any accompanying figures or tables) to the Journal Administrator Faye Kalloniatis at plantgeneticresources@googlemail.com

Notes for Authors are available on the internet at journals.cambridge.org/pgr

Offprints: The corresponding author of an accepted paper will receive a pdf offprint. Additional offprints are available for a fee and should be ordered at proof stage. **No page charges or submission charges are levied by this journal.**
